INTRODUCTION

This is the second volume of the Lancaster series (Part II) of the edition of the London customs accounts (TNA: PRO E122). It is comprised of 1) the wool customs and subsidy particulars of account for 1412; 2) the petty customs controlment roll for 1420/21; 3) the wool customs and subsidy particulars of account for 1422/23; 4) a private petty customs account for the bishop of Winchester for 1423; 5) the tunnage and poundage particulars of account for indigenous merchants for 1425; 6) a draft tunnage and poundage controlment roll for indigenous merchants for 1425; 7) the wool customs and subsidy particulars of account for 1426; 8) the petty customs particulars of account for 1426; and 9) the petty customs particulars of account for 1426/27.

Everything the reader needs to understand about the English customs system – and the peculiarities of the customs administration in London – has been detailed in the introduction to the pilot volume.¹ There are, however, some issues relating to the accounts edited here which need to be discussed. In particular, it needs to be explained 1) why the tunnage and poundage accounts for 1425/26 (No. V, VI) begins on 1 Aug. 1425 and runs only to Michaelmas and furthermore disregards alien trade altogether, recording only indigenous imports and exports and 2) why the petty customs account for the period 10 Mar. to 29 Sept. 1423 (No. IV) is described as a private account for the bishop of Winchester. Let's discuss these matters in that order.

TUNNAGE AND POUNDAGE

Our first problem is the accounting period of E122/76/11 (1 Aug. 1425 to Michaelmas) and its disregard of alien commerce. For an explanation we must reach back to the reign of Henry V, during which parliament granted the king tunnage and poundage twice for state periods of time and finally, in 1416, for life (Table 1).

However, when the infant Henry VI acceded to the throne on the death of his father (31 Aug./1 Sept. 1422), Henry V's grant had, of course, expired along with its beneficiary. Henry VI's first parliament did grant him tunnage and poundage from the date of his accession for just over two years, but mandated that this subsidy be paid by alien merchants alone, leaving their indigenous competitors free. While aliens continued to be subject to tunnage and poundage without a break until the end of the period covered by this volume, parliament ended the indigenous merchants' indemnity in 1425, imposing tunnage and poundage on them, initially from 1 Aug. 1425 until 11 Nov. 1427.

These grants posed a problem for the crown. Immediately upon the first grant of subsidy on 18 Dec. 1422,³ Thomas Walsyngham and William Estfield had been appointed by patent dated 8 Feb. 1423⁴ to collect tunnage and poundage from alien merchants. When parliament made the second grant on 14 July 1425,⁵ to take effect on 1 Aug. following, the crown appointed the same customers on 22 July 1425 to collect tunnage and poundage from indigenous merchants.⁶ Since collection from indigenous and aliens was warranted by different patents, the customers accounted separately for the proceeds. Their account for alien tunnage and poundage for the year running from 29 Sept. 1424 to 29 Sept. 1425 has not survived,⁷ but the account for indigenous tunnage and poundage has and is transmitted as our account E122/76/11.

The second tunnage and poundage account (No. VI) presents a number of mysteries. While the title – *De subsidio indigenarum tonagii et pondagii post festum sancti Petri Advincula anno tercio^a regis Henrici vj^{ti} [1 Aug. 1425] tempore Thome Walsyngham et Willelmi Estfeld collectorum ejusdem subsidii ibidem* – clearly indicates that it is a controlment roll for the proceeds of tunnage and poundage from indigenous merchants, it is quite clearly not a final copy, since many prices are missing. Furthermore, it is written on paper, in contrast to all other particulars of account and controlment rolls, which are all but universally written

on parchment. An analysis of the documents transmitted in the PRO repository E122 which were written on paper demonstrates that they were, without exception, private, unofficial records.⁸ Furthermore, E122/76/13 is bound in chancery style, as opposed to all other particulars and controlment rolls, which are universally bound in Exchequer style. Finally, the period of time it covers does not match the accounting periods recorded in the enrolled account. There, the account is broken into three periods: 1 Aug.–29 Sept. 1425; 29 Sept. 1425–31 Mar. 1426 (Easter); and 31 Mar.–29 Sept. 1426, the break at Easter being occasioned by the appointment of Walter Grene as successor to Richard Quartermayns as controller.⁹ However, our controlment roll records indigenous imports from 1 Aug. 1425 to 21 Jan. 1426 and indigenous exports from 1 Aug. 1425 to 20 Oct. 1425.

It is impossible to account for the anomalies of E122/76/13 in a satisfying manner, but we can eliminate one possibility. In view of the fact that Quartermayns was replaced as controller at Easter, it is conceivable that ill health, perhaps even the approach of death frustrated the completion of the draft account. However, no will, which would have at least provided a *terminus ante quem* for his death, seems to exist.¹⁰

PETTY CUSTOMS

The petty customs account for the period 10 Mar. to 29 Sept. 1423 (No. IV) presents a number of anomalies.¹¹ First of all, it is written on paper and bound in rather swish red leather, very much in contrast to the distinctly utilitarian appearance of other customs documents, which are all written on parchment and bound (if at all) in unprepossessing buff parchment. Second, the customary header at the beginning of the account – reading 'Particulars of account of X₁ and X₂ for the petty customs in Y for the period Z, A being controller at the time' or some variant thereon – is entirely lacking. This cannot be explained by the loss of a leaf, since the first two folios were deliberately left blank, while the account begins without further ado with the first ship on f. 3^r. One can only conclude that no such header was ever entered into the account. Similarly, although it is clear that the codex was produced by the customer(s) – customs income (which a controlment

¹⁰ One draws a blank when consulting the TNA's index for PROB (Provincial Consistory Court of Canterbury), Marc Fitch (ed.), *Index to the Testamentary Records in the Commissar Court of London (London Division), now preserved in the Guildhall Library, London, Volume I: 1374–1488*, London 1969, Marc Fitch (ed.), *Testamentary Records in the Archdeaconry Court of London, Volume I: (1363)–1649*, London 1979 and Reginald R. Sharpe (ed.), *Calendar of Wills proved and enrolled in the Court of Husting, London, Part II: A.D. 1358–A.D. 1688*, London 1890.

¹¹ It is worth adding that the following constitutes an analysis of the external and internal characteristics of the document, a method of determining authenticity pioneered by Sickel and Ficker in the 1870's to identify forgeries. The quickest introduction to this method (with full bibliography) is Alfred Gawlik, 'Ziele einer Diplomata-Edition', *Mittelalterliche Textüberlieferungen und ihre kritische Aufarbeitung*, Munich 1976, p. 52–59.

roll would have omitted) is entered after almost all entries – there is no summary of crown income at the end of the account. Instead, it simply stops after the last entry, leaving five leaves blank. Hence, the omission of a summary of crown income was deliberate and cannot be explained by the loss of a folio. Moreover, nowhere in the account is London specified as the customs district. These anomalies raise the question of how we can be certain that it is a London petty customs account for 1423. This is not an easy question to answer, since the period the account covers does not match any customers' accounting period. As the enrolled account shows, Thomas Denton and Robert Cotton accounted for the proceeds of the petty customs from the date of their appointment (31 Oct. 1422)¹² to the following 9 July 1423, when Cotton was replaced by William Basket.¹³ Richard Huchon served as controller of the petty customs until he was succeeded by Thomas Drayton on 8 Feb. 1423.¹⁴ Despite these personnel changes, the accounting period ran without an internal subdivision to 29 Sept. 1423. Finally, I have described the document as a private record for the bishop of Winchester. These anomalies require some explanation.

Let's begin with the easy question, namely the identification of the codex as a London petty customs account for 1423. The inscription on the cover – *In Navi anno primo regis Henrici Sexti concordanc' cum nigro papiero et rotulis* – and the dating of the first ship – *In navi Thome Castell exeunte 24^o die Marcii anno regni regis Henrici vj^{ti} p[rimo]* – fix the date of the account. The fact that customs income is recorded – and cloth customed by unit and not by price – establishes the codex as particulars of account for the petty customs. Finally, comparison with the wool account for the same year (No. III) proves that the codex was a London account, since the same two Venetian galleys appear in both, recorded as weighing anchor at more or less the same time.¹⁵

However, this does not explain why the account is written on paper or why the period the account covers does not match the customers' accounting period. For this we have to turn back to the days of Henry V, to whom Henry Beaufort, bishop of Winchester, had loaned vast amounts of money. In particular, Beaufort had provided his nephew with two loans of £14,000 each in 1417 and 1421,¹⁶ of which

Wool account: galleys of *Petrus Mychaell* (No. 80, 27 Aug. 1423), *Bernardus Coronere* (No. 81, 27 Aug. 1423). It will be recalled that the customs accounts record the date of issue of the cockets, not the date when the ship left harbor.

just under £20,000 remained unpaid on the death of Henry V.¹⁷ Suspecting that his claims might be neglected, Beaufort had, in 1417, secured a golden crown as surety of repayment and the right to receive all proceeds of the customs and subsidies in Southampton as a means of repayment, both to remain in Beaufort's hands until he was fully satisfied. In particular, Beaufort was empowered to nominate one of the two customers and retain the cocket seal in his own hands.¹⁸ When Beaufort granted Henry V his second loan of £14,000 in 1421, he surrendered the first patent in exchange for a second one, acknowledging receipt of £5693 16d, but retaining control of the Southampton customs.¹⁹ Fearing, however, that war with France might disrupt trade with Southampton – or that the king might order the Italians to void Southampton and land their goods in London, whose customs and subsidies the crown still retained – Beaufort dictated a salvatory clause into the patent.²⁰

'And if by chance through war, ordinance or any other reason whatsoever arising, the course or exercise of trade in the aforesaid port should cease, or if merchants wishing to land at the aforesaid port should be hindered or harrassed, as a result of which these customs and subsidies should fail in the same port; then we [*Henry V*] wish and grant, for ourselves, our heirs and our successors, that the aforesaid bishop, his executors and his assigns should be able to collect and receive the sum still due to him, and then in arrears, of the said sum of £22,306 18s and 8d, lent as has been said above, in our port of London, or in any other port or ports whatsoever in our realm of England, at the choice of the bishop himself, his executors or his attorneys, through a collector to be nominated and assigned for that duty by the bishop himself or his executors in the aforesaid form, as has been said above, for the use and profit of the same bishop, from subsidies, customs and forfeitures of this kind, without any hindrance or obstruction from us, or from our heirs or successors, or from our treasurer of England, or from any other officers or ministers whatsoever of ours, or of our heirs or successors at the time, according to the form and effect of our present grant, until the said sum of £22,306 18s. and 8d. has been fully paid to the same bishop, to his executors, or to their attorneys.'²¹

Upon the accession of Henry VI, parliament granted the wool subsidy and tunnage and poundage to the infant king on 18 Dec. 1422.²² However, it exempted indigenous merchants from tunnage and poundage and earmarked the proceeds of the subsidies for the defence of the realm.²³

Perhaps recognizing what was in the wind – parliament had been convened on 9 Nov. 1422 – Beaufort instantly exercised his options under the 'long commission'

of 1421, successfully claiming the right to collect the proceeds of petty customs in London and five other ports, to judge by his appointment of customers starting on 17 Nov. 1422.²⁴ After the dissolution of parliament, Beaufort again exercised his options, appointing customers to collect the petty customs and the wool subsidy in London and other ports at the beginning of February 1423.²⁵ That brought the issue of the repayment of Beaufort's loans before the council, since it might be reasonably doubted that the diversion of the proceeds of the wool subsidy into Beaufort's coffers was consonant with the spirit and letter of the parliamentary concession. Cleaving more to the dead king's intentions than to the counsel of parliament, the king's council decided (on the advice of the royal judges and sergeants at law) on 15 Feb. 1423 that, as Beaufort's loans had been used to defend the realm, the repayment of those loans from the proceeds of the subsidies was within the remit of the parliamentary grant.

*Isto eciam die disputatum et tractatum fuit quedam longa commissio domini Wyntonie super assignacionem custume et aliorum proficuorum etc. sibi per regem defunctum concessorum in quolibet portu Anglie pro mutuacione certe summe eidem regi mutuatum ad sustentacionem guerrarum suarum. This, then, is the background which enables us to explain the curious form of our account (written on paper, bound in red leather) and its even more baffling accounting period (24 Mar.-24 Sept. 1423). The explanation emerges from the trial of the collectors of petty customs in London (Thomas Denton, Robert Cotton and William Basket) for peculation. On 15 Dec. 1423, the controller of the London petty customs, Thomas Drayton, appeared before the Exchequer and presented a document which had been drawn up by the customers' clerk, John Lokyngton, and which contained a large number of entries which, Drayton alleged, were missing in the particulars of account the customers had submitted to the Exchequer.²⁷ All in all, the crown had been swindled out of £333 8s 9¾d of customs income.

E122/161/1 cannot but be the document which Drayton proffered on 15 Dec. 1423. There are two cogent reasons for this conclusion. First, Cotton defended

himself against the accusation of peculation by pointing out that he was unable to read or write and had consequently left the collection of the customs and all the paperwork to Lokyngton, having no reason to suspect him of fraudulent tendencies. Moreover, Cotton stated, the king had directed him on 22 Feb. 1423 to leave the collection of the petty customs to Thomas Denton, who had been nominated by Beaufort and was acting on his behalf,²⁸ and to deliver the cocket seal to him without delay. Finally, Cotton stated that, having received this mandate on 10 Mar. 1423 in London, he had had nothing further to do with the collection of the petty customs. Cotton's testimony provides a convincing explanation of the curious accounting period of E122/161/1 (24 Mar.-24 Sept. 1423).

The second reason for identifying our customs account with the document handed in to the Exchequer by Drayton is that the Exchequer clerks poured over E122/161/1, checking for discrepancies with the particulars of account. The result of their labors was a long list of 85 discrepancies, which was copied onto the record of the trial of the customers. When one compares the list of discrepancies with E122/161/1, the case for identification becomes unsurmountable, since a scribal hand has entered a dot in the margin of every single entry in E122/161/1 which turns up in the list of discrepancies, and the list of discrepancies adheres exactly to the order of entries in the account. There can be no doubt that our account was the immediate source of the list of discrepancies.

This explains the lack of a heading at the beginning and a summation of crown income at the end of the account. Lokyngton presumably saw no reason whatsoever to clutter up a document – which, after all, was part and parcel of the *papirorum et omnium evidenciarum compota predicta tangencium* and which was in his possession, since the customers had entrusted the collection of the customs and all the attending paperwork to him – with superfluous scribblings. He knew perfectly well what the document contained.

One small footnote on John Lokyngton. As one might suspect, he was summoned to appear before the Exchequer on 19 July 1424 and ordered to hand over all books and other evidence bearing on the petty customs account for 1422/23 which he had in his possession to one of the barons (Thomas Bank), under penalty of £1000.²⁹ On the following day, Bank appeared before his colleagues and handed over a number of books contained in a hempen bag sealed with Lokyngton's seal. Under questioning, Lokyngton confirmed that the bag was, in fact, sealed with his seal. Thereupon, the barons directed him to stand to one side while they inspected the books. Having done so for about an hour, the barons had (as one might well imagine) a number of questions for Lokyngton. In the meantime, however, Lokyngton had scarpered, leaving no further trace in the sources. The Exchequer condemned him to pay the subpoena (which he, having disappeared, conspicuously

²⁸ This is confirmed by the patents of appointment, to which the king's mandate referred: CFR 1422-30, p. 18 (17 Nov. 1422), p. 19 (8 Feb. 1423) and p. 20 (9 July 1423).

failed to do) and to summons him for the next 15 years or so, but Lokyngton had disappeared for good.

Finally, it is not idle to point out to the reader that there is no index of ships by name or by home port in this volume because no ship or home port is named in any account.

The customers' particulars of account were fiscal documents, forming an integral part of the procedure imposed on the customers when accounting for the crown's customs income before the Exchequer. As such, they were marked up by the auditor when he summed up the crown's income according to the various categories and tariffs. These marginated annotations form an integral part of the source and, in my view of it, deserve to be reproduced in full. I have done this in the following way. First of all, the auditor's summations of income at the end of each page or membrane (including the jottings reproducing the position of the counters on the counting table) have been reproduced as written in the account. Second, all other marginated notes (e.g. a cross or an asterisk indicating an error) are noted in the normal way in the critical apparatus. However, recording the eternally repetitive marginal notes on the tariff categories to which particular products belonged (*panni ind'*, *panni al'*, *panni Hans'*, *per breve* etc.) call for a different solution, since including them in the critical apparatus would simply blimp it up to no useful purpose. Consequently, I have indicated them in the text by employing superscript letters in angle brackets (e.g. ^{<A>}De Roberto Derlyngton) and resolving these in a block at the bottom of the page (*Auditor's marginated notations L: <A> panni ind'*).

The problem of the hundredweight is exceedingly vexed. While it is well known that a hundredweight can correspond to 100 lb., 112 lb. or 120 lb. avoirdupois,³⁰ there is no way to know which of these three values applies when a customer writes *c lb.* or fractions and multiples thereof. Just occasionally, when the particulars of account and the controlment roll have survived, some insight is possible, for instance if one of the two records a particular merchant's exports of pewter vessels as *di' c lb. vasorum stanni* and the other the same goods as *lvj lb. vasorum stanni*.³¹ But these cases are far too rare to inspire confident generalizing. Consequently, I have decided to leave the matter unsolved, marking the text in such a way that the reader can easily reconstruct the entry. The most common notation of weight – multiples of 'c' – has not been marked up. Thus 'iij^c lb.' is simply transcribed as 300 lb. If the thousand sign was used, the number is marked with a cross: thus, 'ij M^l lb.' is transcribed as 2000[†] lb. (but xx^c lb. as 2000 lb.) If the sign for one half is used, this is indicated by an asterisk: thus, 'di' c lb.' is transcribed as 50* lb. (but 'l lb.' as 50 lb.) And finally, if the sign for one quarter is used, this is indicated by a double cross: thus, 'c q' lb.' is transcribed as 125[‡] lb.

³⁰ OED s.v. hundredweight.

³¹ Therefore, when transcribing entries regarding the export of pewter vessels, I have retained the hundredweight (e.g. *pro 9 centenis vasorum stanni*).

Diplomatic Notes on the Form of the Edition

The transcriptions of Latin documents in this edition observe the conventions of the *Monumenta Germaniae Historica*. The source texts (and all variants) are reproduced in normal type, while editorial intrusions are printed without exception in italics (e.g. mardre *L3*, *in error*). Unambiguous abbreviations are expanded silently, without using square brackets or italics to indicate missing letters. u/v and i/j have been regularized silently to accord with pronunciation: thus *vniuersalis* in the source text is rendered *universalis*, while 'i' is transcribed if the letter is pronounced as a vowel (*imperii*), and 'j' if the letter is pronounced as a consonant, i.e. like the 'y' in 'you' (*majestas*), even if the source writes *imperij* and *maiestas*.

Personal names and place names are transcribed exactly as written and only regularized in the Index of People and Places.

Roman numerals are reproduced as Arabic numerals, except for the sovereign's ordinal (*Edwardi ivth*). Arabic numerals which occur in the source texts are indicated by bold type. *ob'* is given as ½d, *q'* as ¼d and *ob' q'* as ¾d.

Following the convention in German, I have used a full stop after a number to indicate the ordinal rather than the cardinal, if a number is not written out. Thus, *27. die Januarii* (p. 147) is to be understood as *vicesimo septimo die Januarii*, rather than *viginti septem die Januarii*.

When transcribing the customs accounts, I have numbered the ships consecutively in italics in square brackets. The individual paragraphs of longer texts have also been numbered in the same way. The reason for this is that the web version of the accounts and accounting materials for the Lancastrian period has no pagination, since the amount of text displayed on the screen depends on the size of the monitor and its resolution. Consequently, cross references – whether within a single document, from one document to another or in the indices – to 'page thus-and-such' are meaningless, and some internal sub-division of the text which can be linked in is unavoidable. Since some scholars will want to use the printed version of the edition and others the web edition, it is necessary to provide a common basis. Thus, if one scholar refers to ship No. 24 in the digital version of a particular account, those using the printed version will be able to find the vessel in question.

All dates and cross references in the source texts have been resolved in italics in square brackets in the text of the edition, rather than in footnotes.

If both the particulars of account and the controlment roll survive, certain variants have been suppressed to avoid inflating the text-critical apparatus. Thus, neither the substitution of 'y' in one text for 'i' in the other (e.g. Willyamson, Williamson) nor middle English plural variants (-es, -is, -ys etc.) have been noted in the apparatus criticus. In general, I have limited the notation of textual variants to those cases in which the variant spelling of a word changes the pronunciation. Thus, the variant *federbeds* will be noted against *fetherbeds*, but not *fedderbeds* or *federbeddes* against *federbeds*.

Punctuation is artificial and ignores all medieval full stops, commas and so forth. Since Latin is a syntactic language (like German), the eminently useful MGH convention – namely to employ punctuation (according to the pre-reform German

rules) to mark up the grammatical structure of the sentence – has been employed here. I have also broken up the stylistically elegant, but utterly incomprehensible run-on Latin sentences of the source texts into manageable units.

Since we are dealing with late medieval administrative Latin, there are some cases which call for local by-laws.

First of all, there are a number of middle English words embedded in the Latin texts which have to be assigned a gender, since they are often modified by an abbreviated adjective (e.g. *pro 1 parv' fetherbed*). Since the adjectives are written out in a number of instances (*pro 1 parvo fetherbed*), I have arbitrarily imposed a masculine grammatical gender on all middle English words rather than litter the edition with apostrophes.

Second, the sources themselves are in a muddle as to whether the words *custuma* and *subsidium* are singular or plural, and usually avoid the problem by writing *cust'* and *subs'*. If a scribe does write out the one or the other word, it is almost inevitable that he will contradict himself, writing *custuma* in one line and *custume* a few lines later. This muddle is not merely the result of scribal carelessness or low standards of Latinity. In the fifteenth century, it was possible to differentiate between the collective noun (in the singular) denoting the charges to be paid and the individual sums (in the plural) which each merchant rendered. Even bearing this in mind, however, scribes are simply not consistent. Taking each individual text as a whole, I have done my best to reproduce what the scribe seemed to be thinking.

WOOL CUSTOMS AND SUBSIDY

PARTICULARS OF ACCOUNT

1 SEPT. 1422 – 29 SEPT. 1423

Particulars of account of John Botiller and John Norton for the receipts from the wool customs and subsidy in London during the period from 1 Sept. 1422 to 29 Sept. 1423

L1 TNA: PRO, E122/76/2 (m 1-2 of the account in its original form). Original particulars of account bound in Exchequer style. Parchment. Unsealed. Johannes Boteler, Johannes Norton entered in the center left top of m 1. The auditor has entered a dot (a) above the total of each merchant's exports of staple merchandise, (b) above each merchant's charges for customs and subsidy and (c) above each item in the summation of the exports in a particular ship and the corresponding issues of customs and subsidy and Calais duties.

L2 TNA: PRO, E122/76/3 (m 3-6 of the account in its original form). Original particulars of account bound in Exchequer style. Parchment. Unsealed. Johannes Norton, Johannes Botler collectores London' custum[e] et subs[idii] lanarum et pellium lanutarum entered in the apex of m 1 [m 3 of the whole account]. Severe damage from damp at the foot of the membranes; some holes in m 4 [m 6]; m 1 [m 3] has been ripped into two pieces of unequal size, the smaller of which is still attached to the modern parchment cover originally sewn on to the foot of m 1 [m 3]. The auditor has entered a dot (a) above the total of each merchant's exports of staple merchandise, (b) above each merchant's charges for customs and subsidy and (c) above each item in the summation of the exports in a particular ship and the corresponding issues of customs and subsidy and Calais duties.

Numbering of the membranes in this edition: Ships 1-24 by membranes of L1 (m 1, m 2); ships 25-94 by membranes of L2 (m 1-m 4), followed (in square brackets) by the membrane number which would have been correct if the account had been transmitted in one piece and numbered through on that basis.

TUNNAGE AND POUNDAGE
PARTICULARS OF ACCOUNT
(INDIGENOUS MERCHANTS)
1 AUG. – 29 SEPT. 1425

Particulars of account of Thomas Walsyngham and William Estfeld for the issues of tunnage and poundage in London (indigenous merchandise only) during the period from 1 Aug. to 29 Sept. 1425

L TNA: PRO, E122/76/11. Original particulars of account bound in Exchequer style (1 membrane). Parchment. Unsealed. Contemporaneous numbering of the sole membrane: primus rotulus (m 1). As a finding aid, De subs[idio] indigenarum post festum Advincula sancti Petri anno 3^o regis Henrici vj^{ti} [1 Aug. 1425] was entered on m 1d and would have been visible when the account was rolled up. The account is transmitted in a parchment bag inscribed on the one side London'; Particule compoti Thome Walsyngham et Willelmi Estfeld collectorum subsidii tonagii et pondagii de mercatoribus Anglicanis, videlicet de quolibet dolio vini 3s et de qualibet alia mercandisa ad valorem viginti solidorum 12d de libra, in portu civitatis regis London' et in singulis portibus et locis eidem portui adjacentibus, videlicet de hujusmodi subsidio tonagii et pondagii a festo sancti Petri Advincula anno tercio regis Henrici vj^{ti} [1 Aug. 1425] usque festum sancti Michaelis anno iij^{to} ejusdem regis [29 Sept. 1425]. On the other side the bag is inscribed Particule compoti Thome W[alsynham et Willelmi Estfeld]. The auditor has entered a dot over each merchant's subsidy charge.

TUNNAGE AND POUNDAGE
DRAFT CONTROLMENT ROLL
1 AUG. – 20 OCT. 1425
(INDIGENOUS EXPORTS)
1 AUG. 1425 – 21 JAN. 1426
(INDIGENOUS IMPORTS)

Draft of the controlment roll of Richard Quartremayns for the issues of tunnage and poundage in London during the period from 1 Aug. 1425 to 31 Mar. 1426¹ (this draft contains only indigenous imports to 21 Jan. 1426 and exports to 20 Oct. 1425).

L TNA: PRO, E122/76/13. Controller's draft of the controlment roll bound in chancery style (8 membranes). Paper. Unsealed.

m 1

De subsidio indigenarum tonagii et pondagii post festum sancti Petri Advincula anno tercio^a regis Henrici vjⁱⁱ [1 Aug. 1425] tempore Thome Walsyngham et Willelmi Estfeld collectorum ejusdem subsidii ibidem.

^a quarto L, in error.

De Henrico Frowyk [pro] 2000^a bunchis allei. Precii.....£12 10s

¹ *The enrolled account (Stuart Jenks (ed.), The Enrolled Customs Accounts (PRO, E356, E372, E364) 1279/80-1508/09 (1523/24) Volume 6: E356/15, E356/16 (List and Index Society 319), London 2007, No. 109) informs us about the end of the accounting period, since from Easter (31 Mar.) 1426 Walter Grene succeeded Quartremayns as controller. Even if E122/76/13 consists of 8 membranes, it cannot be identified with the controlment roll Quartremayns handed in to the Exchequer, although this, too, consisted of 8 rotuli. E122/76/13 is written on paper (rather than parchment), bound in chancery style (rather than Exchequer style) and – as even a brief comparison with the customers' particulars for the period up to Michaelmas shows – it is very incomplete.*

^a *Corrected in L from 2500 (xxv^c) by erasure (the error arose from confusion of Frowyk's exports in this ship and the following one).*

 WOOL CUSTOMS AND SUBSIDY
 PARTICULARS OF ACCOUNT
 AND CONTROLMENT ROLL
 15 MAR. – 5 NOV. 1426

Particulars of account of Thomas Chalton and John Norton for the issues of the wool customs and subsidy in London during the period from 15 Mar. to 5 Nov. 1426 and the controlment roll of John Presfen for the same period.

L1 TNA: PRO, E122/76/14. Original particulars of account bound in Exchequer style (2 membranes). Parchment. Unsealed. Badly damaged (the right-hand side of the recto of the membrane has rotted off, so that the issues of the wool customs are seldom legible). Beside the entry for the galley of Nicholaus Mychaell (bottom of m 2) the royal communication to the customers that a safe conduct, valid for one year, had been granted to the Venetian merchants on the previous day (almost certainly the safe conduct dated 15 June 1426: TNA: PRO, C76/108 m 4; Calendered: DKR 48, p. 242) has been sewn onto the membrane. Original. Parchment. Seal on tongue torn off (severe damage from damp: the lower right-hand third of the writ has rotted away).

L2 TNA: PRO, E122/76/15. Original controlment roll (4 membranes: m 1 and m 2 are bound in chancery style; m 3 is sewn onto the head of m 1; m 4 is bound to the bottom of m 3 with a parchment thong). Parchment. Unsealed. Presfen contrarotulator is entered on m 2d.

PARTICULARS OF ACCOUNT
18 OCT. 1426 – 19 FEB. 1427

Particulars of account of Thomas Denton and Hugh Dyke for the issues of the petty customs in London during the period from 18 Oct. 1426 to 19 Feb. 1427

L TNA: PRO, E122/161/4. Original particulars of account bound in Exchequer style (7 membranes: only m. 1-6 and m 8 of the account in its original form are transmitted). Parchment. Unsealed. Contemporary numeration of the membranes save for the designation of m 6 as 3 rotulo (sc. of the exports) lost. Massive damage from damp (the lower half of all membranes has largely rotted away, and the remaining script is very faint). Since the auditor's marginal entries are seldom legible, they are recorded here only if they can be read unambiguously.

¹ *The number of entries and the merchants' names which are legible suggest strongly that the following entries must relate to an Italian galley. Since the wool account for the period 15 Mar. to 5 Nov. 1426 records the embarkation on 5 Nov. 1426 of three Venetian galleys (E122/76/14 m 2-2d), two of which also appear in this account (No. 61 and 62), the strong presumption is that this must be the third. In Jan. 1426 the Venetian senate ordered that a total of five galleys be fitted out for the Flanders and London voyage (CalStPVen No. 235, p. 62). Those travelling to England probably arrived in June, since the crown granted a safe conduct to certain unnamed Venetian merchants trading to England on 15 June 1426 (DKR 48, p. 242). The issuance of wool cockets on 5 Nov. 1426 does not, of course, guarantee that the petty customs cockets were issued on the same day, but one can assume that this will have been done around the same time.*

INDEX OF PEOPLE AND PLACES

In accordance with current usage, the first names of Englishmen and -women have been standardized to their current forms. Thus Willelmus in the accounts is indexed as William and so forth. Italian and Spanish first names are given in the 'ablative' (Andrea, Beaceo, Roderigo rather than Andreas, Beaceus, Roderigus). The first names of other foreigners, who are largely Dutch and German, are normally indexed in something approaching their modern forms, e.g. Johannes, Jacob, Herman, Hugo rather than Hugh (which would indicate an Englishman). However, it is not possible to be entirely consistent. Take, as an example, Willelmus. Is one to index Hanseatic merchants as Wilhelm, but Dutch merchants and shippers as Willem or Wim and the Dinanters as Guillaume? To do so would simply be to introduce incredible confusion, entirely leaving aside the intractable problem of distinguishing between merchants of Dutch and Hanseatic origin. Therefore, in a number of cases I have indexed Dutch and German merchants' first names in the current English form: e.g. Paul, William, Laurence, Andrew, Henry.

Family names have been grouped, where possible, in the index, with cross references leading the reader from the variants to the main entry, which records all variant spellings in parentheses. However, given the inconsistency of the customers' scribes, I have found it impossible to resolve all doubts and have therefore tried to steer a middle course between the splitters and the lumpers. There are cases where there can be no doubt that divergent spellings denote one and the same merchant. On the other hand, there are cases where I am all but certain that variant spellings denote one person, yet am troubled by nagging doubts. In these cases I record the names separately and referred back and forth ('see also N.N.').

The order of the family names in the index is phonological, so that, for instance, 'y' is alphabetized as 'i'.

Only the petty customs accounts distinguish consistently between alien and Hanseatic merchants and only if cloth exports are involved, but not in the case of imports or other exports. Therefore, if an alien merchant does not export cloth, it is impossible to determine whether he is a Hansard or a non-Hanseatic alien. In these cases, I have left the question unsolved, identifying the merchant only as (alien/Hanseatic).

Place names are in small capitals.

INDEX OF SUBJECTS

The index is structured so as to serve as a glossary. Hence, the main entry is under the word as it appears in the sources (*zinziber*), and a cross-reference leads the reader from the modern English term to the main entry (ginger see *zinziber*). If a term is in Middle English, the plural form is also given (e.g. *alle hafte*, -s); if in Latin, the genitive (e.g. *allec*, *ecis*). More than one reference per page is not noted.
