INTRODUCTION

This is the fifteenth volume of the Tudor series (Part IV) of the edition of the London customs accounts (TNA: PRO E122). It is comprised of the wool customs and subsidy particulars of account for 1525/26, 2) the wool customs and subsidy controlment roll for 1526/27 and 3) the wool customs and subsidy particulars of account for 1530/31.

Everything the reader needs to understand about the English customs system – and the peculiarities of the customs administration in London – has been detailed in the introduction to the pilot edition.¹ However, there are some issues to be dealt with.

WOOL ACCOUNT 1525/26

At first glance, stability seems to be the rule here. The staple company continued to retain the proceeds of the wool customs and subsidy (totalling £5664 5s 11d in this period) - which were actually paid over by the merchants on arrival in Calais - by authority of an act of the parliament of 12 Nov. 1515² and a royal mandate directed to the customers dated 9 Apr. 1516, which was not enrolled.

However, the particulars record one shipment of wool to the Mediterranean (*versus partes extras et transmarinas per et ultra strictus de Marrok*) at reduced rates of customs and subsidy, and this needs to be discussed.

The wool in question (14½ sacks, 6 cloves in ship 77, p. 55-6) was exported by the Calais staple merchant John Walsyngham, acting as factor of his fellow staple merchant Richard Fermour. A note appended to this entry states that the customers received 4 marks per sack for customs, subsidy and all other duties by warrant of a patent letter issued to Fermour on 27 Apr. 1515 (Appendix I 1) and a corresponding writ directed to the customers themselves on 24 Oct. 1522 (untraceable). The *determinatio* (p. 60-1) records that the customers had received a total of £38 19s 7d at the rate of 4 marks/sack for this wool, but that Fermour had retained the remainder of the charges which normally would have been due at alien rates required by statute³ (£17 10s 9d calculated at the alien rate of 77s 4d/sack) by judgement of the Exchequer.⁴ The enrolled account⁵ merely repeats this

⁴ TNA: PRO, E368/295 Visus et status compotorum Trinity m 8.

information, adding that Fermour had already exported 284 sacks and 5 cloves of wool – both in his own name and through his factors – at various times via London and Southampton.

That sufficed for the Exchequer. There was no discussion of the matter in the final audit of the account.⁶

WOOL ACCOUNT 1530/31

At first glance, stability would, again, seem to be the rule here. The staple company continued to retain the proceeds of the wool customs and subsidy (totalling £3500 18s 1¼d in this year) - which were actually paid over by the merchants on arrival in Calais - by authority of an act of the parliament of 12 Nov. 1515⁷ and a royal mandate directed to the customers dated 9 Apr. 1516, which was not enrolled.

However, there is one shipment of wool to the Mediterranean at reduced rates of custom and subsidy and two shipments of wool to Calais without payment of subsidy which need to be discussed.

Richard Fermour

The particulars of account record one shipment of wool (29½ sacks, 17 cloves in ship 49, p. 144-5) to the Mediterranean by the Calais staple merchant Nicholas Jonys, acting as factor of his fellow staple merchant Richard Fermour. A note appended to this entry states that the customers received 4 marks per sack for customs, subsidy and all other duties by warrant of a patent letter issued to Fermour on 27 Apr. 1515 (Appendix I 1) and a corresponding writ directed to the customers themselves on 24 Oct. 1522 (untraceable). The *determinatio* (p. 147) records that the customers had received a total of £79 10s 10d at the rate of 4 marks/sack for the wool, but that Fermour had retained the remainder of the charges which normally would have been due at alien rates required by statute⁸ (£35 14s 7½d calculated at the alien rate of 77s 4d/sack).⁹ The enrolled account¹⁰ repeats this information, adding that Fermour had already exported a certain (but unspecified) amount of wool by warrant of his licence and citing the Exchequer's landmark decision in this case.¹¹

⁵ TNA, PRO, PRO, E356/25 m 31. This will be calendered in the next volume of the Enrolled Customs Accounts to appear, as No. 124.

⁶ TNA: PRO, E368/301 Visus et status compotorum Easter m 5.

⁷ LP II, p. 299, No. 1130, 4, copied into the Exchequer's records in TNA: PRO, E159/295 Recorda Michaelmas m 23.

⁸ Statute 20 Hen. VI, c. 4 (*Statutes of the Realm*, vol. 2, p. 318-9).

⁹ The corresponding indenture drawn up by the wool customers and Jonys on 28 Feb. 1531 was sewn into the particulars between f. 9^v and f. 10^f. It is transcribed as Appendix II of the account (p. 150).

¹⁰ TNA, PRO, PRO, E356/26 m 25-25d. This will be calendered in the corresponding volume of the Enrolled Customs Accounts as No. 112.

¹¹ TNA: PRO, E368/295 Status et visus compotorum Trinity m [8].

That sufficed for the Exchequer. There was no discussion of the matter in the final audit of the account.¹²

Ersatz for wool lost at sea in 1528

At the end of the entries for the first wool fleet to depart for Calais, the particulars record shipments of wool (totalling 29 sacks and 9 cloves of wool and 1929 woolfells), also destined for Calais (ship 28-29, p. 134-5), which were not charged subsidy. The explanation given is that the wool in question was a substitute for wool and woolfells which had been shipped in two bottoms (the *Trinitas de Calesia*, skipper John Haddocke, and the *Petrus de Legh*, skipper Richard Spuddelle) which had weighed anchor in London on 8 June 1528 but were subsequently lost at sea with all cargo in a storm. A note appended to the second ship names a writ directed to the customers on 10 Mar. 1531¹³ as warrant for freeing the substitute wool and woolfells from subsidy. That writ, in turn, explains that – by the terms of the subsidy grant in Henry VIII's first regnal year¹⁴ – if a native born Englishmen had paid subsidy (or agreed to terms with the customers) on merchandise (in particular, on staple goods) which was subsequently lost to weather or enemy action on the high seas, that he (or his executors) would be allowed to export exactly as much merchandise as had been lost without payment of subsidy, provided he proved his case to the satisfaction of the treasurer or the chief baron of the Exchequer. Since Ralph Waren, Ralph Rowlet and Roger Mundy had provided the requisite proof to the treasurer on 1 June 1529, which the treasurer, in turn, had certified into the chancery, the king ordered the London wool customers to allow all those who had lost cargo when the *Trinitas de Calesia* and the *Petrus de Legh* sank, to export exactly the same number of sacks of wool and woolfells as had been lost.

The *determinatio* (p. 146) repeats this information, although it totals the substitute wool and woolfells shipped in the *Christoferus de Maydstone* on 24 Apr. 1531, whereas the particulars had distinguished between the *Trinitas de Calesia* and the *Petrus de Legh* (table). The *determinatio* also erroneously states that a total of 1900 woolfells were exported (the correct total was 1929 woolfells).

ship 28 (<i>Christoferus de Maydstone</i> , skipper John Brabson) for wool and woolfells lost in the <i>Trinitas de Calesia</i> (skipper John Haddocke)	
Antony Cave	2 sacks, 18 cloves of wool
George Gillet	2 sacks 8 cloves of wool
Humphrey Leyghtfote	9 sacks, 10 cloves of wool
Roger Mundy	1200 woolfells
ship 29 (<i>Christoferus de Maydstone</i> , skipper John Brabson) for wool and woolfells lost in the <i>Petrus de Legh</i> (skipper Richard Spuddelle)	

¹² TNA: PRO, E368/306 Visus et status compotorum Trinity m 3.

¹³ The the original of this writ was sewn into the particulars of account between f. 6^v and f. 7^r and is transcribed in Appendix I to the particulars (p. 147-50).

¹⁴ LP I No. 341 (5) (St. 1 Hen. VIII c. 20 = Statutes of the Realm III, p. 21-2). This was copied into the Exchequer's records: TNA: PRO, E159/289 Recorda Trinity m 6.

Ralph Waren	6 sacks, 17 cloves of wool
Ralph Rowlet	4½ sacks, 9 cloves of wool
John Sporiar	4 sacks, 25 cloves of wool
Antony Cave	729 woolfells
<i>determinatio</i>	
substitute for wool and woolfells lost in ships leaving London on 8 June 1528	29 sacks, 9 cloves of wool 1900 woolfells (= 8 sacks, 9 fells)

The enrolled account¹⁵ fundamentally reproduces this information (giving the correct total of woolfells). However, it names a different warrant for the non-payment of subsidy¹⁶ and references the king's mandate to the customers of 10 Mar. 1531. In addition, it alleges that the king had sent a corresponding writ to the Exchequer on the same day, but the reference is so vague (*irrotulatum inter brevia directa baronibus de termino* [blank space] *anno* [blank space] *regis hujus rotulo* [blank space] *ex parte rememoratoris regis*) that one suspects it was just a guess. At any rate, no such writ can be found.¹⁷ Finally, the enrolled account mentions the fact that the substitute exports had been recorded in indentures (untraceable) and that an inspection of the the book of particulars of William Uvedale and Humphrey Bowland for the wool customs and subsidy in London from 29 Sept. 1530 to 29 Sept. 1531 had been undertaken, from which it emerged that the said merchants had in fact customed and exported the said wools and woolfells on 8 June 1528.

That sufficed for the Exchequer. There was no discussion of the matter in the final audit of the account.¹⁸

The customers' particulars of account were fiscal documents, forming an integral part of the procedure imposed on the customers when accounting for the crown's customs income before the Exchequer. As such, they were marked up by the auditor when he summed up the crown's income according to the various categories and tariffs. These marginated annotations form an integral part of the source and, in my view of it, deserve to be reproduced in full. I have done this in the following way. First of all, the auditor's summations of income at the end of each page or membrane (including the jottings reproducing the position of the counters on the counting table) have been reproduced as written in the account. Second, all other marginated notes (e.g. a cross or an asterisk indicating an error) are noted in the normal way in the critical apparatus. However, recording the eternally repetitive marginal notes on the tariff categories to which particular products belonged (*panni ind'*, *panni al'*, *panni Hans'*, *per breve* etc.) call for a

¹⁵ TNA: PRO, E356/26 m 25-25d. This will be calendered in the corresponding volume of the Enrolled Customs Accounts as No. 112.

¹⁶ Namely an act of the parliament of 7 Hen. VIII (LP II, p. 299, No. 1130, 4), copied into the Exchequer's records in TNA: PRO, E159/295 Recorda Michaelmas m 23.

¹⁷ I searched the *Brevia directa* for all terms in E159/309 (22 Hen. VIII) and E159/310 (23 Hen. VIII). The writ was not to be found.

¹⁸ TNA: PRO, E368/306 Visus et status compotorum Trinity m 3.

different solution, since including them in the critical apparatus would simply blimp it up to no useful purpose. Consequently, I have indicated them in the text by employing superscript letters in angle brackets (e.g. ^{<a>}De Roberto Derlyngton) and resolving these in a block at the bottom of the page (*Auditor's margined notations L: <a> panni ind?*).

The problem of the hundredweight is exceedingly vexed. While it is well known that a hundredweight can correspond to 100 lb., 112 lb. or 120 lb. avoirdupois,¹⁹ there is no way to know which of these three values applies when a customer writes *c lb.* or fractions and multiples thereof. Just occasionally, when the particulars of account and the controlment roll have survived, some insight is possible, for instance if one of the two records a particular merchant's exports of pewter vessels as *di' c lb. vasorum stanni* and the other the same goods as *lvj lb. vasorum stanni*.²⁰ But these cases are far too rare to inspire confident generalizing. Consequently, I have decided to leave the matter unsolved, marking the text in such a way that the reader can easily reconstruct the entry. The most common notation of weight – multiples of 'c' – has not been marked up. Thus *ijj^c lb.* is simply transcribed as 300 lb. If the thousand sign was used, the number is marked with a cross: thus, *ij M' lb.* is transcribed as 2000[†] lb. (but *xx^c lb.* as 2000 lb.) If the sign for one half is used, this is indicated by an asterisk: thus, *di' c lb.* is transcribed as 50* lb. (but *l lb.* as 50 lb.) And finally, if the sign for one quarter is used, this is indicated by a double cross: thus, *c q' lb.* is transcribed as 125[‡] lb.

Diplomatic Notes on the Form of the Edition

The transcriptions of Latin documents in this edition observe the conventions of the *Monumenta Germaniae Historica*. The source texts (and all variants) are reproduced in normal type, while editorial intrusions are printed without exception in italics (e.g. *mardre L3, in error*). Unambiguous abbreviations are expanded silently, without using square brackets or italics to indicate missing letters. u/v and i/j have been regularized silently to accord with pronunciation: thus *vniuersalis* in the source text is rendered *universalis*, while 'i' is transcribed if the letter is pronounced as a vowel (*imperii*), and 'j' if the letter is pronounced as a consonant, i.e. like the 'y' in 'you' (*majestas*), even if the source writes *imperij* and *maiestas*.

Personal names and place names are transcribed exactly as written and only regularized in the Index of People and Places.

Roman numerals are reproduced as Arabic numerals, except for the sovereign's ordinal (*Edwardi ivth*). Arabic numerals which occur in the source texts are indicated by bold type. *ob'* is given as ½d, *q'* as ¼d and *ob' q'* as ¾d.

Following the convention in German, I have used a full stop after a number to indicate the ordinal rather than the cardinal, if a number is not written out. Thus,

¹⁹ OED s.v. hundredweight.

²⁰ Therefore, when transcribing entries regarding the export of pewter vessels, I have retained the hundredweight (e.g. *pro 9 centenis vasorum stanni*).

27. *die Januarii* (p. 147) is to be understood as *vicesimo septimo die Januarii*, rather than *viginti septem die Januarii*.

When transcribing the customs accounts, I have numbered the ships consecutively in italics in square brackets. The individual paragraphs of longer texts have also been numbered in the same way. The reason for this is that the web version of the accounts and accounting materials for the Lancastrian period has no pagination, since the amount of text displayed on the screen depends on the size of the monitor and its resolution. Consequently, cross references – whether within a single document, from one document to another or in the indices – to 'page thus-and-such' are meaningless, and some internal sub-division of the text which can be linked in is unavoidable. Since some scholars will want to use the printed version of the edition and others the web edition, it is necessary to provide a common basis. Thus, if one scholar refers to ship No. 24 in the digital version of a particular account, those using the printed version will be able to find the vessel in question.

All dates and cross references in the source texts have been resolved in italics in square brackets in the text of the edition, rather than in footnotes.

If both the particulars of account and the controlment roll survive, certain variants have been suppressed to avoid inflating the text-critical apparatus. Thus, neither the substitution of 'y' in one text for 'i' in the other (e.g. Willyamson, Williamson) nor middle English plural variants (-es, -is, -ys etc.) have been noted in the apparatus criticus. In general, I have limited the notation of textual variants to those cases in which the variant spelling of a word changes the pronunciation. Thus, the variant *federbeds* will be noted against *fetherbeds*, but not *fedderbeds* or *federbeddes* against *federbeds*.

Punctuation is artificial and ignores all medieval full stops, commas and so forth. Since Latin is a syntactic language (like German), the eminently useful MGH convention – namely to employ punctuation (according to the pre-reform German rules) to mark up the grammatical structure of the sentence – has been employed here. I have also broken up the stylistically elegant, but utterly incomprehensible run-on Latin sentences of the source texts into manageable units.

Since we are dealing with late medieval administrative Latin, there are some cases which call for local by-laws.

First of all, there are a number of middle English words embedded in the Latin texts which have to be assigned a gender, since they are often modified by an abbreviated adjective (e.g. *pro 1 parv' fetherbed*). Since the adjectives are written out in a number of instances (*pro 1 parvo fetherbed*), I have arbitrarily imposed a masculine grammatical gender on all middle English words rather than litter the edition with apostrophes.

Second, the sources themselves are in a muddle as to whether the words *custuma* and *subsidium* are singular or plural, and usually avoid the problem by writing *cust'* and *subs'*. If a scribe does write out the one or the other word, it is almost inevitable that he will contradict himself, writing *custuma* in one line and *custume* a few lines later. This muddle is not merely the result of scribal carelessness or low standards of Latinity. In the fifteenth century, it was possible to differentiate between the collective noun (in the singular) denoting the charges to be paid and

the individual sums (in the plural) which each merchant rendered. Even bearing this in mind, however, scribes are simply not consistent. Taking each individual text as a whole, I have done my best to reproduce what the scribe seemed to be thinking.

I
WOOL CUSTOMS AND SUBSIDY
PARTICULARS OF ACCOUNT
29 SEPT. 1525 – 29 SEPT. 1526

Particulars of account of William Uvedale, esq., and † William Bulstrode, kt., for the issues of the wool customs and subsidy in London during the accounting period from 29 Sept. 1525 to 16 July 1526 and of William Uvedale, esq., and Humphrey Bowland, gent., for the period from 16 July to 29 Sept. 1526

L TNA: PRO, E122/81/11. Original particulars of account bound as a codex (quire structure XIII^[25]); contemporaneous numbering of the folios from f. 1 to f. 24, (the first folio is blank and unnumbered; the last folio, containing the pes compoti, is also unnumbered) in Roman numerals at bottom center of the recto side of the leaf). Parchment. Unsealed. The auditor's entry of dots is slightly different for each account: in the account of Uvedale and Bowland covering the first eskippacio to Calais (f. 1^r-17^r), the auditor entered dots solely above (a) the totals of customs and subsidy income on hides (f. 17^r) and (b) the total income from the cocket on all exports of wool, woolfells and hides (f. 17^r). In the account of Uvedale and Bowland covering the second eskippacio (f. 17^r-24^r) the auditor entered dots above (a) the total amounts of wool exported in each ship (not, however, above numbers of wool fells or the cocket income), (b) the totals of wool and woolfells for the second eskippacio (f. 23^r) and (c) the total of wool exports and income from customs and subsidy on wools exported to the Mediterranean (f. 23^v).

INDEX OF PEOPLE AND PLACES

In accordance with current usage, the first names of Englishmen and -women have been standardized to their current forms. Thus Willelmus in the accounts is indexed as William and so forth. Italian and Spanish first names are given in the 'ab-lative' (Andrea, Beaceo, Roderigo rather than Andreas, Beaceus, Roderigus). The first names of other foreigners, who are largely Dutch and German, are normally indexed in something approaching their modern forms, e.g. Johannes, Jacob, Herman, Hugo rather than Hugh (which would indicate an Englishman). However, it is not possible to be entirely consistent. Take, as an example, Willelmus. Is one to index Hanseatic merchants as Wilhelm, but Dutch merchants and shippers as Willem or Wim and the Dinanters as Guillaume? To do so would simply be to introduce incredible confusion, entirely leaving aside the intractable problem of distinguishing between merchants of Dutch and Hanseatic origin. Therefore, in a number of cases I have indexed Dutch and German merchants' first names in the current English form: e.g. Paul, William, Laurence, Andrew, Henry.

Family names have been grouped, where possible, in the index, with cross references leading the reader from the variants to the main entry, which records all variant spellings in parentheses. However, given the inconsistency of the customers' scribes, I have found it impossible to resolve all doubts and have therefore tried to steer a middle course between the splitters and the lumpers. There are cases where there can be no doubt that divergent spellings denote one and the same merchant. On the other hand, there are cases where I am all but certain that variant spellings denote one person, yet am troubled by nagging doubts. In these cases I record the names separately and referred back and forth ('see also N.N.').

The order of the family names in the index is phonological, so that, for instance, 'y' is alphabetized as 'i'.

Place names are in small capitals.

INDEX OF SUBJECTS

The index is structured so as to serve as a glossary. Hence, the main entry is under the word as it appears in the sources (*zinziber*), and a cross-reference leads the reader from the modern English term to the main entry (ginger see *zinziber*). If a term is in Middle English, the plural form is also given (e.g. *alle hafte, -s*); if in Latin, the genitive (e.g. *allec, ecis*). More than one reference per page is not noted.
