INTRODUCTION

This is the second volume of the Tudor series (Part IV) of the edition of the London customs accounts (TNA: PRO E122). It is comprised of 1) the petty customs controlment roll and 2) the wool customs and subsidy particulars of account and controlment roll for 1490/91 and 3) the wool customs and subsidy particulars of account for 1491/92.

Everything the reader needs to understand about the English customs system – and the peculiarities of the customs administration in London – has been detailed in the introduction to the pilot edition.¹

The only thing that is out of the ordinary in this volume is that the petty customs controlment roll consistently distinguishes between Hanseatic merchants and other aliens in the import portion of the roll, marking up the Hanseatic merchants' goods (*De Joce Elar, Hans, pro ...* rather than merely *De Joce Elar pro ...*) and distinguishing these goods from the merchandise imported by other aliens (*De Petro Durissa, alienigena, pro ...*), although there was no fiscal reason to do so. Hansards only enjoyed unique tariffs on their cloth exports, but they paid the same rates of petty customs on their imports and on their non-cloth exports as did other aliens. While it is true that the enrolled account for the petty customs in London for 1490/91² notes that cloth exports of the Hanseatic merchants named in the Steelyard's certification were charged at the Hanseatic rates by authority of a decision of the Exchequer,³ there is no trace of a corresponding certification by the Steelyard of the names of the Hanseatic traders with London relating to the account of 1490/91.⁴ Even if there was such a certificate, it would not explain the distinction the controller made between imports effected by Hanseatic and by alien merchants. Nor did the customers (Robert FitzHerbert and William Gall) claim exemption for excess customs charged on Hanseatic imports at any point in their accounting before the Exchequer.

³ TNA: PRO, E368/260 *Visus et status compotorum Michaelmas* m 8.

⁴ Cf. TNA: PRO, E368/265 *Status et visus compotorum Trinity* m 1d. The account was continued in E372/337 *Adhuc Res' London:* and E372/339 *Item London'*. If there had been such a certificate, it would undoubtedly have been transcribed into the record of the customers' final accounting.

To be sure, there had been, until 1488, a need to distinguish Hanseatic trade in the customs accounts, since the Peace of Utrecht had, among other things, mandated an indemnity of £10,000,⁵ the balance of ship seizures on both sides during the 'sea war' between England and the Hanse (roughly 1468-73), which was paid off bit by bit by allowing the Hansards to retain the customs on their imports and exports. Of course, the Exchequer's auditors initially charged the customers with petty customs, tunnage and poundage on Hanseatic merchandise at the old rates, whereupon the customers petitioned for exoneration, proffering among other things the certifications issued by the Steelyard, naming all the Hanseatic merchants who had traded with a particular customs district during a particular accounting period, as well as an indenture certifying the total amount withheld. In approving the petition, the Exchequer lopped off the corresponding amount from the outstanding total.⁶ However, that indemnity had been paid off in 1488. It affords no explanation for the way the controller marked up his controlment roll for 1490/91.

The customers' particulars of account were fiscal documents, forming an integral part of the procedure imposed on the customers when accounting for the crown's customs income before the Exchequer. As such, they were marked up by the auditor when he summed up the crown's income according to the various categories and tariffs. These marginated annotations form an integral part of the source and, in my view of it, deserve to be reproduced in full. I have done this in the following way. First of all, the auditor's summations of income at the end of each page or membrane (including the jottings reproducing the position of the counters on the counting table) have been reproduced as written in the account. Second, all other marginated notes (e.g. a cross or an asterisk indicating an error) are noted in the normal way in the critical apparatus. However, recording the eternally repetitive marginal notes on the tariff categories to which particular products belonged (*panni ind'*, *panni al'*, *panni Hans'*, *per breve* etc.) call for a different solution, since including them in the critical apparatus would simply blimp it up to no useful purpose. Consequently, I have indicated them in the text by employing superscript letters in angle brackets (e.g. ^{<A>}De Roberto Derlyngton) and resolving these in a block at the bottom of the page (*Auditor's marginated notations L: ^{<A>}panni ind'*).

The problem of the hundredweight is exceedingly vexed. While it is well known that a hundredweight can correspond to 100 lb., 112 lb. or 120 lb. avoirdupois,⁷ there is no way to know which of these three values applies when a customer writes *c lb.* or fractions and multiples thereof. Just occasionally, when the particulars of account and the controlment roll have survived, some insight is possible, for instance if one of the two records a particular merchant's exports of

⁵ *Hanserecesse* II 7 No. 142 § 9, p. 345-6.

⁶ See, for instance, the final accounting of the London collectors of petty customs for the period 20 Mar. to 10 Dec. 1486: TNA: PRO, E368/260 Status et visus compotorum m 2.

⁷ OED s.v. hundredweight.

pewter vessels as *di' c lb. vasorum stanni* and the other the same goods as *lvj lb. vasorum stanni*.⁸ But these cases are far too rare to inspire confident generalizing. Consequently, I have decided to leave the matter unsolved, marking the text in such a way that the reader can easily reconstruct the entry. The most common notation of weight – multiples of 'c' – has not been marked up. Thus 'iij^c lb.' is simply transcribed as 300 lb. If the thousand sign was used, the number is marked with a cross: thus, 'ij M^l lb.' is transcribed as 2000[†] lb. (but xx^c lb. as 2000 lb.) If the sign for one half is used, this is indicated by an asterisk: thus, 'di' c lb.' is transcribed as 50* lb. (but 'l lb.' as 50 lb.) And finally, if the sign for one quarter is used, this is indicated by a double cross: thus, 'c q' lb.' is transcribed as 125[‡] lb.

Finally, let it be stated, particularly to those in beatific possession of a fund of such recondite and encyclopedic knowledge as to include *Only Fools and Horses*, that 'Benedict Trotter' (p. 32 et passim) is not my little joke at the expense of the academic community. The gentleman really did exist,⁹ and he was, indubitably, an international trader. I have, alas, not been able to determine if he was originally from Peckham, but if I do, you'll learn about it in the *TLS* in jig time.

⁸ Therefore, when transcribing entries regarding the export of pewter vessels, I have retained the hundredweight (e.g. *pro 9 centenis vasorum stanni*).

⁹ See also *CalB L*, 29.

Diplomatic Notes on the Form of the Edition

The transcriptions of Latin documents in this edition observe the conventions of the *Monumenta Germaniae Historica*. The source texts (and all variants) are reproduced in normal type, while editorial intrusions are printed without exception in italics (e.g. mardre *L3*, *in error*). Unambiguous abbreviations are expanded silently, without using square brackets or italics to indicate missing letters. u/v and i/j have been regularized silently to accord with pronunciation: thus *vniuersalis* in the source text is rendered *universalis*, while 'i' is transcribed if the letter is pronounced as a vowel (*imperii*), and 'j' if the letter is pronounced as a consonant, i.e. like the 'y' in 'you' (*majestas*), even if the source writes *imperij* and *maiestas*.

Personal names and place names are transcribed exactly as written and only regularized in the Index of People and Places.

Roman numerals are reproduced as Arabic numerals, except for the sovereign's ordinal (*Edwardi ivth*). Arabic numerals which occur in the source texts are indicated by bold type. *ob'* is given as ½d, *q'* as ¼d and *ob' q'* as ¾d.

Following the convention in German, I have used a full stop after a number to indicate the ordinal rather than the cardinal, if a number is not written out. Thus, *27. die Januarii* (p. 147) is to be understood as *vicesimo septimo die Januarii*, rather than *viginti septem die Januarii*.

When transcribing the customs accounts, I have numbered the ships consecutively in italics in square brackets. The individual paragraphs of longer texts have also been numbered in the same way. The reason for this is that the web version of the accounts and accounting materials for the Lancastrian period has no pagination, since the amount of text displayed on the screen depends on the size of the monitor and its resolution. Consequently, cross references – whether within a single document, from one document to another or in the indices – to 'page thus-and-such' are meaningless, and some internal sub-division of the text which can be linked in is unavoidable. Since some scholars will want to use the printed version of the edition and others the web edition, it is necessary to provide a common basis. Thus, if one scholar refers to ship No. 24 in the digital version of a particular account, those using the printed version will be able to find the vessel in question.

All dates and cross references in the source texts have been resolved in italics in square brackets in the text of the edition, rather than in footnotes.

If both the particulars of account and the controlment roll survive, certain variants have been suppressed to avoid inflating the text-critical apparatus. Thus, neither the substitution of 'y' in one text for 'i' in the other (e.g. Willyamson, Williamson) nor middle English plural variants (-es, -is, -ys etc.) have been noted in the apparatus criticus. In general, I have limited the notation of textual variants to those cases in which the variant spelling of a word changes the pronunciation. Thus, the variant *federbeds* will be noted against *fetherbeds*, but not *fedderbeds* or *federbeddes* against *federbeds*.

Punctuation is artificial and ignores all medieval full stops, commas and so forth. Since Latin is a syntactic language (like German), the eminently useful MGH convention – namely to employ punctuation (according to the pre-reform German

rules) to mark up the grammatical structure of the sentence – has been employed here. I have also broken up the stylistically elegant, but utterly incomprehensible run-on Latin sentences of the source texts into manageable units.

Since we are dealing with late medieval administrative Latin, there are some cases which call for local by-laws.

First of all, there are a number of middle English words embedded in the Latin texts which have to be assigned a gender, since they are often modified by an abbreviated adjective (e.g. *pro 1 parv' fetherbed*). Since the adjectives are written out in a number of instances (*pro 1 parvo fetherbed*), I have arbitrarily imposed a masculine grammatical gender on all middle English words rather than litter the edition with apostrophes.

Second, the sources themselves are in a muddle as to whether the words *custuma* and *subsidium* are singular or plural, and usually avoid the problem by writing *cust'* and *subs'*. If a scribe does write out the one or the other word, it is almost inevitable that he will contradict himself, writing *custuma* in one line and *custume* a few lines later. This muddle is not merely the result of scribal carelessness or low standards of Latinity. In the fifteenth century, it was possible to differentiate between the collective noun (in the singular) denoting the charges to be paid and the individual sums (in the plural) which each merchant rendered. Even bearing this in mind, however, scribes are simply not consistent. Taking each individual text as a whole, I have done my best to reproduce what the scribe seemed to be thinking.

Finally, on a personal note, it is a sad thing indeed to find oneself finishing a volume of English documents, which, being published in Germany, in itself represents a small, but not negligible link between the Continent and the Sceptered Isle, on the day after Brexit.

 WOOL CUSTOMS AND SUBSIDY
 PARTICULARS OF ACCOUNT
 AND CONTROLMENT ROLL
 29 SEPT. 1490 – 29 SEPT. 1491

Particulars of account of William Tysted and Henry Assheborne for the issues of the wool customs and subsidy in London in the period from 29 Sept. 1490 to 29 Sept. 1491 together with the controlment roll of John Shurley for the same period

L1 TNA: PRO, E122/78/10. Original particulars of account bound as a codex (quire structure: VI¹²¹); the folios were numbered contemporaneously in Arabic numerals from fo. 1 through fo. 11 in the upper right hand corner of the page; f. 12, which contains the continuation of the summa totalis of the account, is not numbered. In addition, the first half of the leaves of the quire are numbered in Arabic numerals from 1 to 6 in the lower right hand corner of the recto side of the folio). Parchment. Unsealed (no hole is visible for the Exchequer seal). The auditor has entered a dot (a) above each packaging unit (be it sarpler, poke or pocket) exported by each merchant (not however over the sum total of wool, woolfells or hides exported by each merchant), (b) above each item in the summation of the individual ships at the bottom of each page, (c) above each item in the summations of the eskippaciones to Calais (f. 1^r, f. 11^v) and Pisa (f. 2^r) and (d) above each item in the summation of the issues on f. 11^v-12^r.

L2 TNA: PRO, E122/78/11. Original controlment roll bound in Exchequer style (2 membranes; no contemporaneous numbering of the membranes is visible). Parchment. Unsealed. Severely damaged by damp.

WOOL CUSTOMS AND SUBSIDY

PARTICULARS OF ACCOUNT

29 SEPT. 1491 – 29 SEPT. 1492

Particulars of account of William Tysted and Henry Assheborne for issues of the wool customs and subsidy in London during the accounting period from 29 Sept. 1491 to 29 Sept. 1492

L TNA: PRO, E122/79/3. Original particulars of account bound as a codex (quire structure: IV⁸ + IV¹⁶; while there is no overall contemporaneous numbering of the folios, the first half of the leaves of both individual quires were numbered contemporaneously in the lower right hand corner of the recto side of the folio, the first quire (= f. 1-4) in Arabic numerals (1, 2, 3, 4) and the second in Roman numerals (1, 2, 3, 4). Parchment. Unsealed (no hole is visible for the Exchequer seal). The auditor has entered a dot (a) above each packaging unit (be it sarpler, poke or pocket) as well as the sum total of wool (not, however, of woolfells) exported by each merchant, (b) above the summations of the individual ships and of the issues of the coket on each page, (c) above each item in the summation of the three eskippaciones to Calais (f. 1^r, 3^r and 15^r) and in the summation of the exports of hides (f. 1^v) and (d) above each item of the crown's income in the summation of the issues on f. 15^v-16^r.

INDEX OF PEOPLE AND PLACES

In accordance with current usage, the first names of Englishmen and -women have been standardized to their current forms. Thus Willelmus in the accounts is indexed as William and so forth. Italian and Spanish first names are given in the 'ab-lative' (Andrea, Beaceo, Roderigo rather than Andreas, Beaceus, Roderigus). The first names of other foreigners, who are largely Dutch and German, are normally indexed in something approaching their modern forms in those languages, e.g. Johannes, Jacob, Herman, Hugo rather than Hugh (which would indicate an Eng-lishman). However, it is not possible to be entirely consistent. Take, as an example, Willelmus. Is one to index Hanseatic merchants as Wilhelm, but Dutch merchants and shippers as Willem or Wim and the Dinanters as Guillaume? To do so would simply be to introduce incredible confusion, entirely leaving aside the intractable problem of distinguishing between merchants of Dutch and Hanseatic origin. Therefore, in a number of cases I have indexed Dutch and German merchants' first names in the current English form: e.g. Paul, William, Laurence, Andrew, Henry.

Family names have been grouped, where possible, in the index, with cross refer-ences leading the reader from the variants to the main entry, which records all vari-ant spellings in parentheses. However, given the inconsistency of the customers' scribes, I have found it impossible to resolve all doubts and have therefore tried to steer a middle course between the splitters and the lumpers, since there are numer-ous cases where there can be no doubt that divergent spellings denote one and the same merchant. On the other hand, there are cases where I am all but certain that variant spellings denote one person, yet am troubled by nagging doubts. In these cases, I recorded the names separately and referred back and forth.

The order of the family names in the index is phonological, so that, for instance, 'y' is alphabetized as 'i'. The English occupational names assigned to those responsible for land transport may require some elucidation. Hence, a 'carter' is understood to be the driver of a two-wheeled cart (*in biga N.N.*), a wagoner the driver of a four-wheeled wagon (*in plaustra N.N.*) and a packhorse driver as a transporter of goods on horseback (*super x equis N.N.*).

Place names are in small capitals.

INDEX OF SUBJECTS

The index is structured so as to serve as a glossary. Hence, the main entry is under the word as it appears in the sources (*zinziber*), and a cross-reference leads the reader from the modern English term to the main entry (ginger see *zinziber*). If a term is in Middle English, the plural form is also given (e.g. *alle hafte*, -s); if in Latin, the genitive (e.g. *allec*, *ecis*). More than one reference per page is not noted.

- *Mynstre* from Münster 20
- *Nyperfelles* 3, 36, 37
- *Osingbruges* from Osnabrück 11, 12, 14
- *pightling* clearly cloth of inner-German origin. Since it was exported from Hamburg — *tho der bee* —, it must have come from somewhere on or close to the river Elbe (Pitz No. 86, p. 62 (1480), No. 246 § 266, p. 248 (1606)), but nothing more is known 3, 4, 35, 36, 37
- , — *Sultwich*¹ from Salzwedel 3

- tyke*, -s the case or cover containing feathers, flocks or the like, forming a mattress or pillow; from 16th century applied to the strong hard linen or cotton material used for such cases (OED s.v. *tick* n.²) 28

¹ There is no consensus on what *pightling* was. Smit 1429, 1438 opts for 'rough linen cloth'; Cobb 184, and Pitz 573 simply for linen cloth (although *pechtling* is clearly exported from Hamburg: Pitz 62, 402), while Gras 752 and OED s.v. *pickling* provide no definition at all. The reference in the London account (p. 3: 2 *pakkes pightling continentibus 800 [ulnas] Sultwich.*) would seem to indicate that 'pightling' is not indicative of a place name, but is rather some way of making or finishing cloth, which could be done anywhere. At any rate, its origins lie unambiguously in Germany, Salzwedel and Hamburg being connected by water.
