INTRODUCTION

This is the fifth volume of the Tudor series (Part IV) of the edition of the London customs accounts (TNA: PRO E122). It is comprised of a single account, namely the petty customs particulars of account and controlment roll for 1502/03.

Everything the reader needs to understand about the English customs system – and the peculiarities of the customs administration in London – has been detailed in the introduction to the pilot edition.¹

There are, however, some issues which have to be dealt with. Specifically, a number of entries were marked up by the auditor as *bere Al'*, *Malvesey Al'*, *per breve* or *Harman Ryng per breve*. These entries can easily be broken down into three groups, namely those relating to alien imports of *Malvesey*, to exports of beer by alien factors of Giles Basse and to exports of cloth by Herman Ryng. It is best to explain them individually.

NEW CUSTOMS CHARGES ON MALMSEY

In analyzing our account, the auditor marked up four alien imports of malmsey,² a strong, sweet wine originally from Monemvasia (Napoli di Malvasia) in Morea, as *Malvesey Al'*. This will require some explanation. By the statute of 7 Hen. VII (1491), c. 7,³ 'new customs' of 18s/butt (126 gallons) were imposed on alien imports of this wine, as a reprisal for the Venetian customs of 4 ducats (18s sterling) for each butt on English exports of malmsey from Candia on Crete. Despite the fact that parliament had imposed this 'new custom' (a fact which made it more akin to tunnage), the Exchequer viewed it as belonging to the petty customs. Accordingly, it was the collectors of the petty customs who received this custom and accounted for it at the Exchequer.

Accordingly, when William Trefrye and William Holybrond came in to account for the petty customs receipts in London in 1502/03, the auditor charged them a total of £102 12s for alien imports of malmsey, citing the parliamentary act of 17 Oct. 1491.⁴ However, at the final hearing of their account,⁵ the customers

petitioned for exoneration for this sum, citing Henry VII's mandate of 12 Mar. 1503 to the Exchequer (Appendix I, No. 1), by which the king suspended the collection of the new custom (of 1491) of 18s/butt on alien imports of malmsey effective from 29 Sept. 1501, for as long as Trefry and Holybrand should remain collectors of the petty customs in London. The Exchequer accepted this argument.⁶

GILES BASSE

The auditor also marked up a number of entries in the petty customs particulars of account recording exports of beer by various alien factors of Giles Basse in each case both as *bere Al'* and *per breve*.⁷ The enrolled account⁸ shows that the auditor charged the customers 24s 5¼d (at 3d/£) for the value of these exports (£97 15s), totalling 97¾ tuns of beer. However, at the full hearing of their account,⁹ the customers petitioned for exoneration from this charge, citing a royal mandate dated 21 Jan. 1501 (Appendix II, No. 1), by which the king, having granted Giles Basse a licence, valid for four years, to purchase 500 tuns of beer in England and export without payment of customs, subsidy or other duties, ordered all officials to allow him to do so. By virtue of this mandate (and the corresponding one directed to the Exchequer on 5 Mar. 1501: Appendix II, No. 2), Basse's factors had retained the customs in their own hands. The Exchequer accepted this argument in principle, but only granted exoneration for the charge (16s 6¼d) on 66 of the 97¾ tuns,¹⁰ arguing that Basse had therewith exhausted his contingent. The customers remained on the hook for the remainder.

HERMANN RYNG

The auditor also marked up a number of entries recording exports of cloth by the Cologne merchant Herman Ryng as *Harman Ryng per breve*.¹¹ Curiously, the enrolled account¹² makes no mention of any corresponding petition submitted by the customers. However, Trefry and Holybrand did submit two petitions regarding Ryng in the course of the full hearing of their account.¹³ It is important to keep these petitions separate, since they are easy to confuse.

In the first petition, the customers requested allocation of £20 paid to Ryng, citing the king's patent dated 2 Aug. 1502, by which he granted Ryng £20 annually for life, to be reckoned against the customs due on his imports and exports via London (Appendix III No. 1), a corresponding *breve de liberate currans* directed to the customers (not enrolled) together with the corresponding *breve de allocate dormaunt* dated 17 Sept. 1502 directed to the Exchequer (Appendix III No. 2) and finally Ryng's receipt, dated 15 Nov. 1503, for the £20 he had retained from the petty customs due on his goods in 1502/03 (Appendix III No. 3). The Exchequer accepted this argument.¹⁴

Thereupon Trefry and Holybrand presented a second petition,¹⁵ requesting allocation for £30 paid to Ryng by authority of a royal patent dated 25 Nov. 1502 (Appendix IV No. 1), granting Ryng an annuity of £30 for life, beginning on 29 Sept. 1502, payable from the the London petty customs which otherwise would have been charged on Ryng's imports and exports and those of other Hanseatic merchants. In their petition, the customers cited this patent, a *breve de liberate curraunt* directed to them (not enrolled) together with the corresponding *breve de allocate dormaunt* to the Exchequer (Appendix IV No. 2) and a receipt from Ryng dated 15 Dec. 1503 (Appendix IV No. 3). The Exchequer accepted this argument.¹⁶

Finally, there is a mystery which I cannot solve. In ship 91 (p. 30), the Genoese merchant Vescut de Aureo is recorded as having imported - alongside of his own merchandise - 90 pieces of ribbon (worth £8) *super licenciam Petri Champayn*. Petty customs were collected in the normal manner on this merchandise, which explains why there is no auditor's mark-up in the margin. However, neither the shipment nor Champayn's licence is mentioned anywhere in the enrolled account, the final audit or the final reckoning in the pipe roll, presumably because - whatever rights the licence granted to Champayn - it did not affect royal income.

The customers' particulars of account were fiscal documents, forming an integral part of the procedure imposed on the customers when accounting for the crown's customs income before the Exchequer. As such, they were marked up by the auditor when he summed up the crown's income according to the various categories and tariffs. These marginated annotations form an integral part of the source and, in my view of it, deserve to be reproduced in full. I have done this in the following way. First of all, the auditor's summations of income at the end of each page or membrane (including the jottings reproducing the position of the counters on the counting table) have been reproduced as written in the account. Second, all other marginated notes (e.g. a cross or an asterisk indicating an error) are noted in the normal way in the critical apparatus. However, recording the eternally repetitive marginal notes on the tariff categories to which particular products belonged (*panni ind'*, *panni al'*, *panni Hans'*, *per breve* etc.) call for a different solution, since including them in the critical apparatus would simply

blimp it up to no useful purpose. Consequently, I have indicated them in the text by employing superscript letters in angle brackets (e.g. ^{<a>}De Roberto Derlyngton) and resolving these in a block at the bottom of the page (*Auditor's marginated notations L: <a> panni ind?*).

The problem of the hundredweight is exceedingly vexed. While it is well known that a hundredweight can correspond to 100 lb., 112 lb. or 120 lb. avoirdupois,¹⁷ there is no way to know which of these three values applies when a customer writes *c lb.* or fractions and multiples thereof. Just occasionally, when the particulars of account and the controlment roll have survived, some insight is possible, for instance if one of the two records a particular merchant's exports of pewter vessels as *di' c lb. vasorum stanni* and the other the same goods as *lvj lb. vasorum stanni*.¹⁸ But these cases are far too rare to inspire confident generalizing. Consequently, I have decided to leave the matter unsolved, marking the text in such a way that the reader can easily reconstruct the entry. The most common notation of weight – multiples of 'c' – has not been marked up. Thus *ijj^c lb.* is simply transcribed as 300 lb. If the thousand sign was used, the number is marked with a cross: thus, *ij M' lb.* is transcribed as 2000[†] lb. (but *xx^c lb.* as 2000 lb.) If the sign for one half is used, this is indicated by an asterisk: thus, *di' c lb.* is transcribed as 50* lb. (but *l lb.* as 50 lb.) And finally, if the sign for one quarter is used, this is indicated by a double cross: thus, *c q' lb.* is transcribed as 125[‡] lb.

Diplomatic Notes on the Form of the Edition

The transcriptions of Latin documents in this edition observe the conventions of the *Monumenta Germaniae Historica*. The source texts (and all variants) are reproduced in normal type, while editorial intrusions are printed without exception in italics (e.g. *mardre L3, in error*). Unambiguous abbreviations are expanded silently, without using square brackets or italics to indicate missing letters. *u/v* and *i/j* have been regularized silently to accord with pronunciation: thus *vniuersalis* in the source text is rendered *universalis*, while 'i' is transcribed if the letter is pronounced as a vowel (*imperii*), and 'j' if the letter is pronounced as a consonant, i.e. like the 'y' in 'you' (*majestas*), even if the source writes *imperij* and *maiestas*.

Personal names and place names are transcribed exactly as written and only regularized in the Index of People and Places.

Roman numerals are reproduced as Arabic numerals, except for the sovereign's ordinal (*Edwardi ivth*). Arabic numerals which occur in the source texts are indicated by bold type. *ob'* is given as ½d, *q'* as ¼d and *ob' q'* as ¾d.

Following the convention in German, I have used a full stop after a number to indicate the ordinal rather than the cardinal, if a number is not written out. Thus, *27. die Januarii* (p. 147) is to be understood as *vicesimo septimo die Januarii*, rather than *viginti septem die Januarii*.

¹⁷ OED s.v. hundredweight.

¹⁸ Therefore, when transcribing entries regarding the export of pewter vessels, I have retained the hundredweight (e.g. *pro 9 centenis vasorum stanni*).

When transcribing the customs accounts, I have numbered the ships consecutively in italics in square brackets. The individual paragraphs of longer texts have also been numbered in the same way. The reason for this is that the web version of the accounts and accounting materials for the Lancastrian period has no pagination, since the amount of text displayed on the screen depends on the size of the monitor and its resolution. Consequently, cross references – whether within a single document, from one document to another or in the indices – to 'page thus-and-such' are meaningless, and some internal sub-division of the text which can be linked in is unavoidable. Since some scholars will want to use the printed version of the edition and others the web edition, it is necessary to provide a common basis. Thus, if one scholar refers to ship No. 24 in the digital version of a particular account, those using the printed version will be able to find the vessel in question.

All dates and cross references in the source texts have been resolved in italics in square brackets in the text of the edition, rather than in footnotes.

If both the particulars of account and the controlment roll survive, certain variants have been suppressed to avoid inflating the text-critical apparatus. Thus, neither the substitution of 'y' in one text for 'i' in the other (e.g. Willyamson, Williamson) nor middle English plural variants (-es, -is, -ys etc.) have been noted in the apparatus criticus. In general, I have limited the notation of textual variants to those cases in which the variant spelling of a word changes the pronunciation. Thus, the variant *federbeds* will be noted against *fetherbeds*, but not *fedderbeds* or *federbeddes* against *federbeds*.

Punctuation is artificial and ignores all medieval full stops, commas and so forth. Since Latin is a syntactic language (like German), the eminently useful MGH convention – namely to employ punctuation (according to the pre-reform German rules) to mark up the grammatical structure of the sentence – has been employed here. I have also broken up the stylistically elegant, but utterly incomprehensible run-on Latin sentences of the source texts into manageable units.

Since we are dealing with late medieval administrative Latin, there are some cases which call for local by-laws.

First of all, there are a number of middle English words embedded in the Latin texts which have to be assigned a gender, since they are often modified by an abbreviated adjective (e.g. *pro 1 parv' fetherbed*). Since the adjectives are written out in a number of instances (*pro 1 parvo fetherbed*), I have arbitrarily imposed a masculine grammatical gender on all middle English words rather than litter the edition with apostrophes.

Second, the sources themselves are in a muddle as to whether the words *custuma* and *subsidium* are singular or plural, and usually avoid the problem by writing *cust'* and *subs'*. If a scribe does write out the one or the other word, it is almost inevitable that he will contradict himself, writing *custuma* in one line and *custume* a few lines later. This muddle is not merely the result of scribal carelessness or low standards of Latinity. In the fifteenth century, it was possible to differentiate between the collective noun (in the singular) denoting the charges to be paid and the individual sums (in the plural) which each merchant rendered. Even bearing this in mind, however, scribes are simply not consistent. Taking each individual

text as a whole, I have done my best to reproduce what the scribe seemed to be thinking.

I
 PETTY CUSTOMS
 PARTICULARS OF ACCOUNT AND
 CONTROLMENT ROLL
 29 SEPT. 1502 – 29 SEPT. 1503

Particulars of account of William Trefry and William Holybrond for the issues of the petty customs in London in the period from 29 Sept. 1502 to 29 Sept. 1503 together with the controlment roll of Simon Dygby for the same period

L1 TNA: PRO, E122/80/2. Original particulars of account bound in Exchequer style (31 membranes, the first 30 of which were contemporaneously numbered in Roman numerals at the bottom centre of the recto side of the membrane; in addition, most of the import membranes (m 1-14) were numbered in Roman numerals in the upper left-hand corner of the membrane (numbers omitted m 13-14), almost all of the export membranes (m 15-30) were numbered in Roman numerals in the upper right-hand corner of the membrane (numbering omitted m 19), while the last membrane (m 31), which contains the auditor's summation of the issues, was not numbered). Parchment. Unsealed. The auditor has entered dots (a) on the import membranes above the total value of each merchant's cargo (or the total number of quintals of wax) and the customs charge; (b) on the export membranes above the total value of merchandise customed ad valorem, while there is inconsistent dotting of each cloth exporter's 'nationality' (indigenous, alien, Hansard) and the customs charge owing for cloth and ad valorem merchandise. Some damage from wear

L2 TNA: PRO, E122/80/3. Original controlment roll bound in Exchequer style (29 membranes, contemporaneously numbered in Roman numerals at the bottom centre of the recto side of the membrane; in addition, the import and export membranes were numbered separately in Arabic numerals in the upper right-hand corner of the membrane (1-13 (m 1-13), 1-16 (m 14-29)). Parchment. Unsealed. Minor damage from damp from m 21 onwards.

INDEX OF PEOPLE AND PLACES

In accordance with current usage, the first names of Englishmen and -women have been standardized to their current forms. Thus Willelmus in the accounts is indexed as William and so forth. Italian and Spanish first names are given in the 'ablative' (Andrea, Beaceo, Roderigo rather than Andreas, Beaceus, Roderigus). The first names of other foreigners, who are largely Dutch and German, are normally indexed in something approaching their modern forms, e.g. Johannes, Jacob, Herman, Hugo rather than Hugh (which would indicate an Englishman). However, it is not possible to be entirely consistent. Take, as an example, Willelmus. Is one to index Hanseatic merchants as Wilhelm, but Dutch merchants and shippers as Willem or Wim and the Dinanters as Guillaume? To do so would simply be to introduce incredible confusion, entirely leaving aside the intractable problem of distinguishing between merchants of Dutch and Hanseatic origin. Therefore, in a number of cases I have indexed Dutch and German merchants' first names in the current English form: e.g. Paul, William, Laurence, Andrew, Henry.

Family names have been grouped, where possible, in the index, with cross references leading the reader from the variants to the main entry, which records all variant spellings in parentheses. However, given the inconsistency of the customers' scribes, I have found it impossible to resolve all doubts and have therefore tried to steer a middle course between the splitters and the lumpers. There are cases where there can be no doubt that divergent spellings denote one and the same merchant. On the other hand, there are cases where I am all but certain that variant spellings denote one person, yet am troubled by nagging doubts. In these cases I record the names separately and referred back and forth ('see also N.N.').

The order of the family names in the index is phonological, so that, for instance, 'y' is alphabetized as 'i'.

Place names are in small capitals.

INDEX OF SUBJECTS

The index is structured so as to serve as a glossary. Hence, the main entry is under the word as it appears in the sources (*zinziber*), and a cross-reference leads the reader from the modern English term to the main entry (ginger see *zinziber*). If a term is in Middle English, the plural form is also given (e.g. *alle hafte*, -s); if in Latin, the genitive (e.g. *allec*, *ecis*). More than one reference per page is not noted.
