INTRODUCTION

This is the tenth volume of the Lancaster series (Part II) of the edition of the London customs accounts (TNA: PRO E122). It is comprised of 1) the wool customs and subsidy particulars of account and controlment roll for 1449; 2) the tunnage and poundage particulars of account for 1447/48; 3) the tunnage and poundage particulars of account for 1449/50; 4) the wool customs and subsidy particulars of account and controlment roll for 1449/50; and 5) the tunnage and poundage particulars of account and controlment roll for 1450.

Everything the reader needs to understand about the English customs system – and the peculiarities of the customs administration in London – has been detailed in the introduction to the pilot volume.¹ There are, however, some issues which need to be dealt with.

WOOL ACCOUNT 1446

Certain of the customers' and auditor's entries in the wool account for 1446 (No. I, p. 1ff. in this volume) require explanation. First, in summing up the exports of the Florentine merchant Angelo Donati de Alledobrando (ship 1, p. 3), the customers entered *custuma nichil* and (below that) *subsidiu nichil per breve domini regis* in the right-hand margin. Then both were struck through and a customs charge of £20 15s 6¾d and a subsidy charge of £90 5d interlined in the appropriate places. Both charges were calculated at the alien rates. Second, a + [cross] and *licencia* were marginated against the entry containing the exports of the Florentine merchants Gerosus de Pilles and Belizardus de Bardes (ship 2, p. 3). And finally, when summing up the exports which the indigenous merchant Bertinus Entweshull, kt., executed through his deputy and factor John Bouchier (ship 3, p. 4), *custuma et exitus sigilli nichil per breve domini regis* and (below that) *subsidiu pro Calesia appunctuatum £41 15s 10d; et de residuo non respondent per breve domini regis* were originally entered in the right-hand margin. Then both entries were struck through and charges for customs (£13 18s 4d) and subsidy (£69 12s 11¼d) interlined as appropriate. These charges were calculated at the indigenous rates. In passing, it is worth noting that the wool exports of Donati and Entweshull were summed separately in the *determinatio* at the end of the account, but not those of Pilles and Bardes.

Let us take these cases through in the order named.

¹ Stuart Jenks (ed.), *The London Customs Accounts 24 Henry VI (1445/46)*, Cologne: Böhlau, 2018.

The enrolled account² shows that the auditor – mindful of his duty to maximize crown revenue – imposed three surcharges on Donati's shipments. Donati, it is noted there, had exported 4½ sacks and 2½ cloves of wool *ad partes exteras* by authority of a royal licence issued on 20 Nov. 1442.³ The first surcharge was for £20 15s 6¾d of customs (§ 2), the second for £90 5d of subsidy (§ 5) and the last for 27s 9d of Calais duties (§ 12). When the customers appeared before the full Exchequer for the final audit of their account, they petitioned for exoneration for the entire sum (£112 3s 10¾d, including the cocket fee), explaining that Donati had exported the wool in question in two ships the previous year and had already paid all customs, subsidy and other charges.⁴ In support of their arguments, the customers referred the Exchequer to their wool account for 1445/46,⁵ a royal writ dated 12 Oct. 1446 directed to them and sewn onto their petition⁶ and finally the corresponding royal mandate to the Exchequer dated 13 Oct. 1446.⁷ The last two writs rehearse the story of the licence the king had granted to Donati and his loading of the wool in two ships and payment of all duties. They go on to say that Donati – being afraid to ship the wool to Middelburgh or Antwerp in view of the activities of the king's enemies and of pirates on the high seas – unloaded the wool again in London, proposing to re-ship it at a later, more propitious time. In the meantime, he petitioned the king to allow him to do so without paying customs, subsidy and other charges a second time. To this request the king acceded, ordering the customers to allow Donati to re-ship the wool without further charges and the Exchequer to exonerate the customers accordingly.

Needless to say, the Exchequer investigated Donati's claim to have customed his wool the previous year, calling up the wool customs and subsidy account for 1445/46.⁸ Inspection of the particulars proved that Donati had, indeed, customed his wool, and the Exchequer exonerated the customers from the surcharge the auditor had imposed on them.⁹

⁶ This writ is transcribed in the record of the audit (A 3 § 4 in the web version).

Second, as noted above, + [a cross] and the word *licencia* were marginated against the entry containing the exports of the Florentine merchants Gerosus de Pilles and Belizardus de Bardes (ship 2, p. 3), but customs and subsidy (and all other applicable duties) were collected as normal. Now, the licence to which the marginated entry refers cannot be the one of which both Florentine merchants had made use in the immediately preceding years. That licence, issued on 7 Dec. 1442,¹⁰ had allowed de Pilles and de Bardes to export 400 sacks of wool from London to Lombardy via Middelburg or Antwerp, noting, however, that they had already exported 388 sacks and 22 cloves of the total, leaving only 11½ sacks and 4 cloves to be exported before the licence was exhausted. de Pilles and de Bardes took care of the rest on 15 Nov. 1445, exporting 12½ sacks and 5½ cloves of wool.¹¹ Therefore, the licence in question has to be the one granted by the king on 14 Nov. 1446.¹² However, since it only gave the merchants permission to export, but did not grant them any reduction of customs or subsidy, the case did not interest the Exchequer in the slightest and was never mentioned in the enrolled account or the final audit.

Third, in the summation of the wool exported by Bertinus Entweshull, kt., through his indigenous deputy and factor John Bouchier (ship 3, p. 4), *custuma et exitus sigilli nichil per breve domini regis* and (below that) *subsidiium pro Calesia appunctuatum £41 15s 10d; et de residuo non respondent per breve domini regis* were originally entered in the right-hand margin. The auditor struck these entries through and interlined the full charges for customs (£13 18s 7d) and subsidy (£69 12s 11¼d) calculated at the indigenous rates above them. Accordingly, the enrolled account records both surcharges.¹³

When the customers appeared before the full Exchequer for the final audit of their account,¹⁴ they petitioned for exoneration for all charges over and above the 20s/sack mandated by parliament for Calais, first referencing the licence Henry VI had granted to Entweshull on 23 Aug. 1445. This licence was not enrolled, but it is adequately summarized in the corresponding order to the London wool customers and the other paperwork in the case.¹⁵ Explaining that Entweshull had been taken prisoner in France and had been subjected to an exceedingly burdensome ransom in order to regain his freedom, the king had granted him 3000 saluts (*saluz*) towards these expenses at the Exchequer. As the Exchequer was unable to disburse this much money, the king then permitted him to export 500 sacks of wool to Calais, paying only the wool subsidy (20s/sack) mandated by parliament for

Calais, but without payment of customs (6s 8d/sack) or the remainder of the wool subsidy (13s 4d/sack). In support of their petition, the customers produced the king's writ directed to them on 24 July 1446¹⁶ and referenced the corresponding mandate directed to the Exchequer on 20 May 1447.¹⁷ The Exchequer agreed,¹⁸ granting the customers the exoneration they had requested, recording its judgement also in the enrolled account.¹⁹

WOOL ACCOUNT 1449/50

The particulars of account for wool customs and subsidy for 1449/50 (account IV, p. 85ff. in this volume) differ markedly from their predecessors. Normally, the customs and subsidy (and, when applicable, the Calais duties and cocket fees) each merchant owed on a given shipment of wool or woolfells were merely entered in the right-hand margin, as the following example, drawn from the wool account of 1438/39, shows.²⁰

De Johanne Reynewell, indigena, 3200 pelles lanute facientes 13¼ saccos, 20 pelles in 9 fardelliscust' £4 8s 11d
subs' £22 4s 5½d

In the present account, the auditor often enough first entered (in the right-hand margin, in lighter ink) the customs charge, then below that the subsidy charge of 20s/sack earmarked for Calais (*subs' 20s pro Calesia appunctuatum*) and finally, below that (either in the margin or, if there was not enough room, in a separate paragraph) a longer or shorter explanation of how much wool subsidy the merchant had retained and by what warrant, as the example below shows.²¹

De Thoma Cantelowe, indigena, 2 s[acci], 24 [clavi]; 2 s[acci], 23 [clavi]. Summa 4½ sacci, 21 clavi lane in 2 sarpellariis..... cust' 32s 8½d
subs' 20s pro Calesia appunctuatum £4 18s 2d

Et de residuo subsidii predicti attingente ad summam 65s 6d nichil, eo quod dictus Thomas Cantelowe summam predictam inter alias summas in diversis navibus subsequenter expressatas in manu sua propria retinet et habet in partem solucionis octingenta, triginta et duarum librarum, decem et octo solidorum et decem denariorum eidem Thome Cantelowe ac Willelmo Cantelowe et Alano Johanson mercatoribus societatis stapule regis Calesie per dominum regem pro denariis ab eis mutuatis debitarum, prout eidem

²¹ Ship 1, p. 87. Such explanations can be greatly abbreviated.

Thome bene liquet, virtute brevis²² dicti domini regis de magno sigillo suo datum 12^o die Novembris anno regni sui 28^o [12 Nov. 1449] collectoribus custum[arum] et subs[idiorum] regis predicti, qui nunc sunt et qui pro tempore erunt, directi et penes ipsos remanentis

As the entry states, Cantelowe retained 65s 6d of wool subsidy in part repayment of a loan of £832 18s 10d which he – together with the Calais staple merchants William Cantelowe and Alan Johanson – had granted the crown. Cantelowe's retention of subsidy was warranted by a royal writ of 12 Nov. 1449 directed to the customers. Cantelowe was, therefore, only one member of a consortium of three royal creditors belonging to the Calais wool staple and was acting here on behalf of his fellow members.

However, such entries were not universal. A good number of merchants' shipments were recorded in the normal way, with a notation in the right-hand margin of how much customs and subsidy was due on the shipment in question, but with no indication that the merchant had retained any portion of the wool subsidy (e.g. Richard Rouhed, p. 88). Indeed, the very merchants (like Thomas Cantelowe), who had initially retained part of the wool subsidy, suddenly ceased to do so. For instance, Cantelowe retained a portion of the wool subsidy due on all of his shipments up to and including ship 5 (p. 94). Thereafter, he was charged subsidy at the full rate and retained nothing.

That is not the end of the mysteries. At the end of the account – instead of the usual brief summary of customs and subsidy income from indigenous and alien merchants – there appears a long summary of the wool and woolfell exports (§§ 70-91, p. 172-9). These are clearly organized by creditor consortia and not by individual merchants. They sum up the wool (or woolfells) exported by the members of the consortium in question, state the customs charge, the amount of the subsidy earmarked for Calais and the remainder retained by the members of the consortium. They also name the warrant for subsidy retention (a writ directed to the customers on 12 Nov. 1449), the corresponding order to the Exchequer and finally the number of indentures by which shipments were recorded.

This may seem very confusing, but it is in fact simple enough, once the background is sketched in.

Starting around the middle of Henry VI's reign, the crown began to borrow large sums of money from individual staple merchants and later from the staple company as a whole. Those contributing to the loan were repaid by allowing them to retain the wool subsidy on their exports for a certain period, usually ranging from two to four years. In 1449,²³ increasing French military pressure on Calais and Gascony (the last English possessions on the continent) made the need for cash acute. This placed the crown in an unenviable position. First of all, it had to clear its old debts

²² Cf. *CPR* 1446-52, p. 314-5 dated 20 Oct. 1449.

²³ On these developments see W.I. HAWARD, 'The Relations between the Lancastrian Government and the Merchants of the Staple from 1449 to 1461', in: Eileen POWER and M.M. POSTAN (eds.), *Studies in English Trade in the Fifteenth Century*, London: Routledge, 1933, p. 293-320, here p. 294-6.

(£10,700) which had been accumulating for some years, as members of the Calais staple company advanced funds (which the Exchequer had been unable or unwilling to disburse) to the noblemen charged with the defense and victualling of the Calais staple. Second, it had to raise fresh funds for the defense of the English possessions on the continent.

The first task was to retire the crown's old debts. Repaying was not made any easier by the fact that, in 1449, parliament had reserved 20s/sack of the wool subsidy for Calais.²⁴ Consequently, the crown was only able to repay its debts to its staple company creditors out of the 13s 4d per sack which remained after deduction of the portion of the wool subsidy reserved for Calais. Despite this handicap, the crown managed to reach an agreement with the staple company.²⁵ Acknowledging arrears of £10,700, the crown agreed to discharge its debts by allowing named members of the staple company to export wool free of subsidy (exclusive of the 20s/sack earmarked for Calais) for four years, retaining the remaining 13s 4d/sack in repayment of the crown's debts. However, this agreement was not struck between the crown and the staple company as such, but between the crown and a number of consortia of staple merchants (usually comprised of 2-3 merchants),²⁶ each of which had notionally loaned the crown a certain amount of money and which was therefore allowed to recoup a quarter of its portion of the total loan each year by retaining the wool subsidies on its exports in that year.²⁷

In 1449/50 every London consortium exported at least enough wool (or woolfells) to fill its quota for the year, as the table shows.

The second agreement with the staple company was designed to repay those staple company merchants who had advanced £2000 to the captain of Calais for the safe-keeping of the town. As the king's patent states,²⁹ the loan had been divided among four consortia – consisting of merchants of Boston, Ipswich, Hull and London – who were allowed to export wool and woollens from their respective harbors, retaining 13s 4d/sack in repayment of their portion of the total loan. The London-based consortium, headed by the mayor of Calais, Robert White, had contributed 400 marks (£266 13s 4d) and was allowed to export wool and woollens on which the wool subsidy amounted to 1000 marks was due, retaining 400 marks thereof in repayment. As the table below shows, its members fulfilled their quota.

When the customers came into the Exchequer to account,³⁰ they did not respond for the amount of wool subsidy retained by the crown's staple company creditors. Instead, distinguishing between the two loans (£10,700 and £2000), they first recorded the total amount of customs and subsidy (at 6s 8d/sack for customs and 20s/sack subsidy earmarked for Calais) which all the participating merchants had actually paid on their total exports, then the amount they had retained (at 13s 4d/sack). Then they specified the merchant's warrant for retaining part of the wool subsidy, i.e. the patent letter the king had issued and the corresponding writs directed to the customers and the Exchequer (one such pair of writs for each consortium). Finally, they proffered the indentures they had drawn up with the representatives of the various consortia recording the amount of wool (and woolfells) they had exported under the terms of the king's patent, as summarized in the table below.

Loan of £10,700

Exports reckoned against loan	Sum notionally due to the crown	Warrants for retention by consortia

151,882 woolfells = 733 sacks, 62 fells		

In regard to the second, smaller loan (£2000), the customers equally did not respond to the crown. Instead, they first recorded the total amount of customs and subsidy (at 6s 8d/sack for customs and 20s/sack subsidy earmarked for Calais) which all the participating merchants had actually paid on their total exports,³¹ then the amount they had retained (at 13s 4d/sack).³² Then they specified the merchants' warrant for retaining part of the wool subsidy, i.e. the king's patent of 20 Mar. 1450, and the corresponding writs (also dated 20 Mar. 1450) directed to the customers and the Exchequer.³³ Finally, they proffered the indentures they had drawn up with the representatives of the various consortia recording the amount of wool (and woolfells) they had exported under the terms of the king's patent.³⁴

In both cases, the Exchequer accepted the customers' arguments.

³³ The writ directed to the Exchequer was enrolled in TNA: PRO, E159/227 Brevia directa baronibus Michaelmas m 41d (No. P 39 in web version). The writ to the customers was not enrolled.

³⁴ These indentures are untraceable.

Now, it is clear that reckoning retained subsidies against a yearly quota for each of a dozen or more consortia whose members had granted two distinct loans to the crown (which had to be accounted for separately) could easily result in immense confusion, particularly since Robert White, William Combes and John Walden had contributed to both loans.³⁵

The auditor came up with a simple – and rather clever – system of mark-ups to ward off the danger of confusion. If a merchant had contributed to the larger loan (£10,700) and had retained the wool subsidy due on a given shipment in part payment of his consortium's loan, the auditor marginated *breve* against the entry. Once the consortium had exhausted its year's quota, the auditor marginated *breve ultimum* against the last entry. All further shipments by members of that consortium were then charged the full indigenous rate of wool subsidy.

If a merchant had contributed to the smaller loan (£2000) and had retained the wool subsidy due on a given shipment in part payment of his consortium's loan, the auditor marginated *breve de 400 marcis* against the entry. Once the consortium had exhausted its quota for the year, the auditor marginated *breve de 400 marcis ultimum* against the last entry. All further shipments by members of that consortium were charged the full indigenous rate of wool subsidy.

Thus, it was child's play to cast one's eye down the left-hand margin and see at a glance if a shipment was being counted against a particular consortium's year's quota. Moreover, it was simple to assign retained subsidies to one of the two loans, so that the possibility of confusion was eliminated.

Finally, the monarch's consort, queen Margaret, had shipped a total of 99¾ sacks and 2 cloves of wool to Calais through her (indigenous) deputy Thomas Coke,³⁶ and the auditor's mark-ups require some explanation. In each instance, the customers had originally entered *cust' nichil per breve* and (below that) *subs' nichil per breve* in the right-hand margin. The auditor struck these entries through and entered the appropriate sums for customs and subsidy calculated at the indigenous rates. In the *determinatio* at the end of the account,³⁷ these surcharges were summed up. They were then transferred onto the enrolled customs account.³⁸

When the customers appeared before the full Exchequer for the final audit of their account,³⁹ they petitioned for exoneration for the surcharge (totalling £199 11s 8d). In so doing, they proffered the writ (dated 21 Mar. 1450) the king had directed to them (which was sewn onto their petition) and referenced the king's

³⁵ We need to bear in mind that it was the auditor's job to determine (subject to the final judgement of the whole Exchequer) how much the customers owed the crown, not how much the merchants owed the customers. How the customers collected their money from the merchants was their problem, not the Exchequer's.

corresponding mandate (dated 22 Mar. 1450) to the Exchequer.⁴⁰ In addition, they proffered the indenture Thomas Coke had drawn up with them, recording all the queen's exports of wool and the amount of money due for customs and subsidy which she (through her deputy) had retained in her own hand.⁴¹ Finally, almost a year after they began accounting, they referenced an additional privy seal writ (dated 21 Nov. 1452) directed to the Exchequer,⁴² stating that, as queen Margaret had surrendered various unpaid tallies worth a total of £1500 to the Exchequer for destruction, the king by patent⁴³ issued on 24 July 1448 had permitted her to export through her deputies as much wool, woollen cloth and tin as the customs and subsidies might amount to the said £1500 and retain that sum. Finally, the Exchequer agreed to exonerate the customers, determining that queen Margaret was to answer to the crown herself for the sum in question, which she, in fact, did.⁴⁴

TUNNAGE AND POUNDAGE ACCOUNT 1447/48

Only one membrane of the first tunnage and poundage account in this volume (No. II, p. 7ff. in this volume), which originally covered the period from 17 July 1447 to 22 Oct. 1448, has survived, namely m 1, covering imports from 17 July to 9 Sept. 1447. As the enrolled account shows,⁴⁵ a large amount of wine was imported free of tunnage. However, since none of these imports were recorded on the surviving membrane, there is nothing which requires explanation

TUNNAGE AND POUNDAGE ACCOUNT 1449/50

The second tunnage and poundage account, covering the period from 10 June 1449 to 31 Mar. 1450 (No. III, p. 13ff. in this volume), does contain a number of entries recording the tunnage-free import of wine. In these cases, the customers entered *subs' nichil per breve* (or *subs' nichil per breve predictum*) in the right-hand margin (instead of recording a charge for tunnage) and sewed the corresponding writ onto the margin of the page in the appropriate place.⁴⁶ When marking up the account, the auditor marginated *breve* against each such entry.

The writs state that the king had allowed the import of the said amounts of wine free of subsidy because it had been bought in Gascony and France, either for consumption in the households of those named (*pro expensis hospiciorum suorum*) and (in some cases) also to pay debts owing to the beneficiaries' creditors in

When they accounted,⁴⁸ the customers simply did not respond to the crown for any tonnage income on these wine shipments, referencing the seven writs the king had directed to them. The Exchequer raised no objection, and that was the end of the matter.

TUNNAGE AND POUNDAGE ACCOUNT 1450

The tonnage and poundage account covering the period 31 Mar. to 29 Sept. 1450 (No. V, p. 181ff. in this volume) contains four entries recording wheat exports (on 16 and 17 Apr. 1450) for which the customers did not charge poundage.⁴⁹ In each instance, the customers entered *sb' nichil per breve* in the right-hand margin of the page (rather than a charge for poundage) and sewed the corresponding royal writ mandating release from poundage onto the margin.⁵⁰ When marking up the account, the auditor marginated *Per breve* against these entries both in the particulars of account and in the controlment roll.

When they came into the Exchequer to account, the customers did not respond to the crown for any poundage income from these shipments.⁵¹ Instead, they cited one of two writs (both dated 12 Apr. 1450) directed to them, each of which referenced one of two patent letters in which the king licensed certain merchants to purchase

wheat, beans and other grains in England and export it – free of customs, subsidy and all other charges – to Bayonne for the victualling of that town. The beneficiaries of the first of these licences, issued on 24 Feb. 1450,⁵² were Dominico de Monsegur, John de Howas and Salvato de Larra (for a total of 2400 qtr), while Salbato de Dengnachop received the second patent (600 qtr), issued on 4 Mar. 1450.⁵³ Monsegur, Howas and Larra divided their total quota up among themselves, as the table shows.

The Exchequer accepted the customers' arguments, and that was the end of the matter.

The customers' particulars of account were fiscal documents, forming an integral part of the procedure imposed on the customers when accounting for the crown's customs income before the Exchequer. As such, they were marked up by the auditor when he summed up the crown's income according to the various categories and tariffs. These marginated annotations form an integral part of the source and, in my view of it, deserve to be reproduced in full. I have done this in the following way. First of all, the auditor's summations of income at the end of each page or membrane (including the jottings reproducing the position of the counters on the counting table) have been reproduced as written in the account. Second, all other marginated notes (e.g. a cross or an asterisk indicating an error) are noted in the normal way in the critical apparatus. However, recording the eternally repetitive marginal notes on the tariff categories to which particular products belonged (*panni ind'*, *panni al'*, *panni Hans'*, *per breve* etc.) call for a different solution, since including them in the critical apparatus would simply blimp it up to no useful purpose. Consequently, I have indicated them in the text by employing superscript letters in angle brackets (e.g. ^{<a>}De Roberto Derlyngton) and resolving these in a block at the bottom of the page (*Auditor's marginated notations L: ^{<a>}panni ind'*).

The problem of the hundredweight is exceedingly vexed. While it is well known that a hundredweight can correspond to 100 lb., 112 lb. or 120 lb. avoirdupois,⁵⁴ there is no way to know which of these three values applies when a customer writes *c lb.* or fractions and multiples thereof. Just occasionally, when the particulars of account and the controlment roll have survived, some insight is possible, for instance if one of the two records a particular merchant's exports of pewter vessels

⁵⁴ OED s.v. hundredweight.

as *di' c lb. vasorum stanni* and the other the same goods as *lvj lb. vasorum stanni*.⁵⁵ But these cases are far too rare to inspire confident generalizing. Consequently, I have decided to leave the matter unsolved, marking the text in such a way that the reader can easily reconstruct the entry. The most common notation of weight – multiples of 'c' – has not been marked up. Thus *ijj^c lb.* is simply transcribed as 300 lb. If the thousand sign was used, the number is marked with a cross: thus, *ij M^l lb.* is transcribed as 2000[†] lb. (but *xx^c lb.* as 2000 lb.) If the sign for one half is used, this is indicated by an asterisk: thus, *di' c lb.* is transcribed as 50* lb. (but *l lb.* as 50 lb.) And finally, if the sign for one quarter is used, this is indicated by a double cross: thus, *c q' lb.* is transcribed as 125[‡] lb.

Diplomatic Notes on the Form of the Edition

The transcriptions of Latin documents in this edition observe the conventions of the *Monumenta Germaniae Historica*. The source texts (and all variants) are reproduced in normal type, while editorial intrusions are printed without exception in italics (e.g. *mardre L3, in error*). Unambiguous abbreviations are expanded silently, without using square brackets or italics to indicate missing letters. u/v and i/j have been regularized silently to accord with pronunciation: thus *vniuersalis* in the source text is rendered *universalis*, while 'i' is transcribed if the letter is pronounced as a vowel (*imperii*), and 'j' if the letter is pronounced as a consonant, i.e. like the 'y' in 'you' (*majestas*), even if the source writes *imperij* and *maiestas*.

Personal names and place names are transcribed exactly as written and only regularized in the Index of People and Places.

Roman numerals are reproduced as Arabic numerals, except for the sovereign's ordinal (*Edwardi ivth*). Arabic numerals which occur in the source texts are indicated by bold type. *ob'* is given as $\frac{1}{2}d$, *q'* as $\frac{1}{4}d$ and *ob' q'* as $\frac{3}{4}d$.

Following the convention in German, I have used a full stop after a number to indicate the ordinal rather than the cardinal, if a number is not written out. Thus, *27. die Januarii* (p. 147) is to be understood as *vicesimo septimo die Januarii*, rather than *viginti septem die Januarii*.

When transcribing the customs accounts, I have numbered the ships consecutively in italics in square brackets. The individual paragraphs of longer texts have also been numbered in the same way. The reason for this is that the web version of the accounts and accounting materials for the Lancastrian period has no pagination, since the amount of text displayed on the screen depends on the size of the monitor and its resolution. Consequently, cross references – whether within a single document, from one document to another or in the indices – to 'page thus-and-such' are meaningless, and some internal sub-division of the text which can be linked in is unavoidable. Since some scholars will want to use the printed version of the edition and others the web edition, it is necessary to provide a common basis. Thus, if one

⁵⁵ Therefore, when transcribing entries regarding the export of pewter vessels, I have retained the hundredweight (e.g. *pro 9 centenis vasorum stanni*).

scholar refers to ship No. 24 in the digital version of a particular account, those using the printed version will be able to find the vessel in question.

All dates and cross references in the source texts have been resolved in italics in square brackets in the text of the edition, rather than in footnotes.

If both the particulars of account and the controlment roll survive, certain variants have been suppressed to avoid inflating the text-critical apparatus. Thus, neither the substitution of ‘y’ in one text for ‘i’ in the other (e.g. Willyamson, Williamson) nor middle English plural variants (-es, -is, -ys etc.) have been noted in the apparatus criticus. In general, I have limited the notation of textual variants to those cases in which the variant spelling of a word changes the pronunciation. Thus, the variant *federbeds* will be noted against *fetherbeds*, but not *fedderbeds* or *federbedes* against *federbeds*.

Punctuation is artificial and ignores all medieval full stops, commas and so forth. Since Latin is a syntactic language (like German), the eminently useful MGH convention – namely to employ punctuation (according to the pre-reform German rules) to mark up the grammatical structure of the sentence – has been employed here. I have also broken up the stylistically elegant, but utterly incomprehensible run-on Latin sentences of the source texts into manageable units.

Since we are dealing with late medieval administrative Latin, there are some cases which call for local by-laws.

First of all, there are a number of middle English words embedded in the Latin texts which have to be assigned a gender, since they are often modified by an abbreviated adjective (e.g. *pro 1 parv’ fetherbed*). Since the adjectives are written out in a number of instances (*pro 1 parvo fetherbed*), I have arbitrarily imposed a masculine grammatical gender on all middle English words rather than litter the edition with apostrophes.

Second, the sources themselves are in a muddle as to whether the words *custuma* and *subsidiu*m are singular or plural, and usually avoid the problem by writing *cust’* and *subs’*. If a scribe does write out the one or the other word, it is almost inevitable that he will contradict himself, writing *custuma* in one line and *custume* a few lines later. This muddle is not merely the result of scribal carelessness or low standards of Latinity. In the fifteenth century, it was possible to differentiate between the collective noun (in the singular) denoting the charges to be paid and the individual sums (in the plural) which each merchant rendered. Even bearing this in mind, however, scribes are simply not consistent. Taking each individual text as a whole, I have done my best to reproduce what the scribe seemed to be thinking.

TUNNAGE AND POUNDAGE PARTICULARS OF ACCOUNT 10 JUNE 1449 - 31 MAR. 1450

Particulars of account of John Pury and John Somerton for the issues of tunnage and poundage in London during the period from 10 June 1449 to 31 Mar. 1450

L TNA: PRO, E122/73/23. Original particulars of account (imports) bound in codex form (quire structure: $X^{20} + X^{40}$). Parchment. Unsealed (hole for Exchequer seal visible in lower right-hand corner of the recto side of the leaves). Contemporaneous foliation (by the Exchequer) from f. 1 to f. 40 in Roman numerals in the lower right-hand corner of the recto side of the folios. f. 31^v-32^v, f. 39^r-f. 40^r are blank and not cut open. Three double leaves have been cut out between f. 32^v and f. 39^r. The (separately bound) export codex is bound within the import codex between the last leaf and the back cover. Entries on the covers: De 10^o die Junii anno 27^o usque ultimum diem Marcii anno 28^o (inside of the front cover); Subsidium portus London'; continet [40] folia (outside of the front cover). Some damage from reagents on f. 1^r and from damp on f. 1-3. The auditor has entered dots (a) above the sum totals of wine and general merchandise imports on f. 31^r, (b) the corresponding issues of tunnage and poundage there and (c) above the crown's total income from the subsidy there.

L PRO, TNA: E122/73/23. Original particulars of account (exports) bound in codex form (quire structure: XI^{24}). Parchment. Unsealed (hole for Exchequer seal visible in upper left-hand corner of the recto side of the leaves). Entries on the covers: Continet 24 folia; (beneath that) In navi pro subsidio in portu London' (outside of the back cover); 24 foylys (on the outside of the flap of the back cover). The (separately bound) export codex is bound within the import codex between the last leaf and the back cover. The recto side of the first folio is blank and the last six folios are blank and uncut. The foliation of the codex is, to say the least, chaotic. Before sending it out to the customers, the Exchequer foliated the codex f. 1 to f. 24 in Roman numerals. However, the customers (or their clerk) apparently did not take notice of the Exchequer's efforts, but rather turned the codex around and began their entries on the last page. Hence, the Exchequer's folio numbers appear in the upper left-hand corner of the verso side of the leaf and run from f. 24^v to f. 1^r. The customers then proceeded to a partial foliation of the codex, entering 4 f. through 17 f. in Roman numerals in the upper right-hand corner of f. 21^v through 8^v (in the Exchequer's foliation). Finally, when the PRO stamped folio numbers on the leaves in the twentieth century, it ignored all blank pages in the import codex (i.e. those following f. 31^r) and foliated the export codex as a continuation of the import codex, thus designating f. 24^v through f. 6^v (in the Exchequer's foliation of the exports) as f. 31^v through f. 49^v. One cannot avoid providing all three designations of a

given page.¹ The first folio number given (in bold type) is the stamped number assigned by the PRO, since that is what most scholars will have quoted. There follow (separated by forward slashes) the Exchequer's foliation (in italics in the form "f. ...") and – if present – the customers' foliation (in normal type in the form "fol. ..."). The auditor has entered dots (a) above the sum total general merchandise exports on f. 48^v, (b) the corresponding issues of poundage there and (c) above the crown's total income from the subsidy there.

¹ Were one to give the reader only the folio numbers as assigned by the PRO, remarks such as "Six folios (f. 32-38 in the Exchequer's foliation) have been cut out of the codex here. The remaining two folios (f. 39-40) are blank and uncut." at the end of the *import* section followed by the folio number f. 31^v at the beginning of the *export* section would be extraordinarily confusing.

 WOOL CUSTOMS AND SUBSIDY
 PARTICULARS OF ACCOUNT
 AND CONTROLMENT ROLL
 29 SEPT. 1449 - 20 DEC. 1450

Particulars of account of John Poutrell and William Beaufitz for the issues of the wool customs and subsidy in London during the period from 29 Sept. 1449 to 20 Dec. 1450 and the controlment roll of Thomas Pounce for the same period.

L1 TNA: PRO, E122/73/26. Original particulars of account bound as a codex (quire structure: $X^{20} + X^{40} + X^{60}$). Parchment. Unsealed (the hole for a cord for the Exchequer seal is visible in the lower left-hand corner of the cover and recto sides of the folios of the codex). Contemporary foliation (f. 1-f. 60 in Roman numerals in the lower right-hand corner of the recto side of the folio) was clearly undertaken in the Exchequer prior to distribution to the customers. The modern stamped pagination is inconsistent (the outside front cover was stamped as p. 1 and the outside back cover as p. 118; however, f. 1^r was not stamped because it is blank; f. 57^v-58^r and f. 59^v-60^r were not stamped because they were not slit open). Portus London' — continet 100 folia has been entered on the outside back cover (hence, two gatherings of 20 folios each must have been removed). The auditor has entered a dot (•) (a) over each sum of wool sacks, (b) each entry for customs and subsidy income, (c) above the name of each merchant who retained a portion of the wool subsidy by virtue of a royal writ (breve) and (d) above each item in the sum total of the crown's income on f. 52^v-f. 55^v (pp. 104-111 stamped).

L2 TNA: PRO, E122/77/5. Original controlment roll bound in Exchequer style (10 membranes, not contemporaneously numbered). Parchment. Unsealed. Minor damage from damp and wear and tear. The dorsal side of each membrane is blank.

[f. 1^r is blank]

TUNNAGE AND POUNDAGE
PARTICULARS OF ACCOUNT AND
CONTROLMENT ROLL
31 MAR. - 29 SEPT. 1450

Particulars of account of John Somerton and Richard Joynour for the issues of tunnage and poundage in London during the period from 31 Mar. to 29 Sept. 1450 together with the controlment roll of John Croke for the same period

L1 TNA: PRO, E122/73/25. Original particulars of account bound in codex form (quire structure: $X^{20} + X^{40}$; contemporaneously numbered from f. 1 to f. 40 in Roman numerals in the lower right-hand corner of the recto side of the folios). Parchment. Unsealed (the hole for the cord of the Exchequer seal is visible in the lower left-hand corner of the recto side of the cover and the individual folios). On the outside of the back cover: London'; Subsidium; continet 40 [folia]. In the upper left-hand corner of f. 1^r: Jhesus. Ricardus Joynour collector subsidii: De Navi. The auditor has entered a dot (a) above each merchant's subsidy charge, (b) above each item in the summation of the issues of tunnage and poundage on f. 40^r and (c) above the crown's total income from the subsidy there.

L2 TNA: PRO, E122/76/43. Original controlment roll bound in Exchequer style (9 membranes). Parchment. Unsealed. In the upper left-hand corner of m 1: Tempore Ricardi Joynour et Johannis Somerton; on m 7: Hic intravit Ricardus Joynour anno 28^o regis Henrici vijth. Imports (m 1-6) and exports (m 7-9) were originally sewn together separately, then together. Contemporaneous numbering of the membranes: 1 [m 1], 2 [m 2], 3 [m 3], 4 [m 4], 5 [m 5], [m 6 was not numbered], rotulo primo [m 7], rotulo 2^{do} (above that rotulo 5^o struck through) [m 8], rotulo 3^o [m 9].

INDEX OF PEOPLE AND PLACES

In accordance with current usage, the first names of Englishmen and -women have been standardized to their current forms. Thus Willelmus in the accounts is indexed as William and so forth. Italian and Spanish first names are given in the 'ab-lative' (Andrea, Beaceo, Roderigo rather than Andreas, Beaceus, Roderigus). The first names of other foreigners, who are largely Dutch and German, are normally indexed in something approaching their modern forms, e.g. Johannes, Jacob, Herman, Hugo rather than Hugh (which would indicate an Englishman). However, it is not possible to be entirely consistent. Take, as an example, Willelmus. Is one to index Hanseatic merchants as Wilhelm, but Dutch merchants and shippers as Willem or Wim and the Dinanters as Guillaume? To do so would simply be to introduce incredible confusion, entirely leaving aside the intractable problem of distinguishing between merchants of Dutch and Hanseatic origin. Therefore, in a number of cases I have indexed Dutch and German merchants' first names in the current English form: e.g. Paul, William, Laurence, Andrew, Henry.

Family names have been grouped, where possible, in the index, with cross references leading the reader from the variants to the main entry, which records all variant spellings in parentheses. However, given the inconsistency of the customers' scribes, I have found it impossible to resolve all doubts and have therefore tried to steer a middle course between the splitters and the lumpers. There are cases where there can be no doubt that divergent spellings denote one and the same merchant. On the other hand, there are cases where I am all but certain that variant spellings denote one person, yet am troubled by nagging doubts. In these cases I record the names separately and referred back and forth ('see also N.N.').

The order of the family names in the index is phonological, so that, for instance, 'y' is alphabetized as 'i'.

Place names are in small capitals.

INDEX OF SUBJECTS

The index is structured so as to serve as a glossary. Hence, the main entry is under the word as it appears in the sources (*zinziber*), and a cross-reference leads the reader from the modern English term to the main entry (ginger see *zinziber*). If a term is in Middle English, the plural form is also given (e.g. *alle hafte*, -s); if in Latin, the genitive (e.g. *allec*, *ecis*). More than one reference per page is not noted.
